

प्रस्तावना

ग्रामीण विकास के क्षेत्र में विभिन्न हितधारकों के लिए जानकारी के स्रोत के रूप में संभाव्यतायुक्त ऋण योजनाओं (पीएलपी) का महत्व हर वर्ष बढ़ रहा है. इस दस्तावेज़ का उद्देश्य विभिन्न क्षेत्रों के अंतर्गत उपलब्ध भौतिक संभावनाओं का अभिनिर्धारण करना है, जिसमें ग्रामीण अर्थव्यवस्था और बैंक ऋण के माध्यम से ऐसी संभावनाओं को वित्तपोषित करने की सीमा शामिल है. संभावनाओं का आकलन करते समय जिले में उपलब्ध वर्तमान आधारभूत सुविधाएं, संभावनाओं के पूर्ण दोहन के लिए अतिरिक्त आधारभूत सुविधाओं की आवश्यकता, बैंक ऋण में पिछली प्रवृत्तियाँ और अगले वर्ष के लिए कल्पित अन्य परिवर्तनों पर विचार किया जाता है.

दोहन योग्य संभावनाओं के अभिनिर्धारण का उद्देश्य नीति निर्माताओं, विशेषकर केंद्र और राज्य सरकारों को अगले वर्ष के लिए उनकी योजनाओं/ बजट को अंतिम रूप देते समय इस दस्तावेज़ से संकेत मिल सके. अतः यह दस्तावेज़ केवल जिले की वार्षिक ऋण योजना को अंतिम रूप देने के लिए जिला स्तर पर ऋण आयोजना के कार्य के लिए रोड मैप तैयार करना नहीं है बल्कि अन्य हितधारकों द्वारा भी जमीनी स्तर पर संभावित परिणामों के लिए इसे आगे ले जाने हेतु आधारभूत सुविधाओं और संस्थागत कमियों और आवश्यकताओं के साथ जोड़ना है.

वर्ष 2019-20 की संभाव्यतायुक्त ऋण योजना(पीएलपी) का मुख्य विषय 'संधारणीय कृषि प्रथाओं को अपनाना' है. इस विषय के विभिन्न पहलुओं के अंतर्गत राज्य में उठाए गए पहलों और इस कारण से बैंक ऋण की संभावनाओं का प्रतिबिंब इस पीएलपी दस्तावेज़ में पड़ता है.

यह दस्तावेज़ जिला विकास प्रबंधक और जिले के हितधारकों जैसे अग्रणी जिला प्रबंधक, सरकारी विभागों, बैंकों, गैर सरकारी संगठनों और जमीनी स्तर पर लाभार्थियों के बीच हुई व्यापक परामर्श प्रक्रिया की पराकाष्ठा है. यह दस्तावेज़ एक विकसित होने वाली प्रक्रिया है और विभिन्न क्षेत्रों में हो रहे परिवर्तनों को इसमें शामिल करने के प्रयास किए जाते हैं.

नाबार्ड सभी योजनाकारों के लिए एक उपयोगी माध्यम के रूप में इस दस्तावेज़ को तैयार करने के लिए आवश्यक जानकारी प्रदान करने में सहयोग के लिए राज्य और जिला स्तर पर संबंधित विभागों के अधिकारियों, भारतीय रिज़र्व बैंक, राज्य स्तरीय बैंकर्स समिति, जिला स्तर समितियों, कृषि विश्वविद्यालयों/ संस्थाओं और अन्य आधार स्तरीय संस्थानों का आभार व्यक्त करता है.

आपके अमूल्य सुझावों और प्रतिक्रियाओं की प्रतीक्षा रहेगी.

(यू डी शिरसालकर)

नाबार्ड, महाराष्ट्र क्षेत्रीय कार्यालय, पुणे

07 सितंबर 2018

Foreword

The importance of the Potential Linked Credit Plan (PLP), as a source of input for various stakeholders in the field of rural development, has been increasing over the years. The document aims to identify the physical potential that is available under various sectors constituting the rural economy and the extent to which such potential can be financed through bank credit. The infrastructure presently available in the district, additional infrastructure required for full exploitation of potential, the past trend in the flow of bank credit and other changes visualized for the next year are some of the factors considered, while assessing the potential.

The objective of identifying the exploitable potential is to further enable the policy makers, especially the Central and State Governments to take a cue from this document while finalizing their plans/budgets for the next year. The document thus not only comes out with the road map for credit planning exercise at the district level for finalizing the Annual Credit Plan of the district, but also to connect with the infrastructural and institutional gaps and requirements to take it forward for a possible outcome at the ground level by other stakeholders too.

The theme of the PLP 2019-20 is 'Adoption of Sustainable Agricultural Practices'. The initiatives undertaken in the state under various dimensions of this theme and the potential for bank credit therefor find a place in this PLP document.

This document is a culmination of an elaborate consultative process, between the DDM and the stakeholders in the district such as the LDM, line departments, banks, NGOs, and beneficiaries at the ground level. The document has been evolving and attempts have been made to reflect the changes that are taking place in various sectors.

NABARD places its appreciation for the functionaries and departments at the State and at the District level, Reserve Bank of India, the State Level Bankers Committee, the District Level committees, Agriculture Universities/ Institutions and other ground level institutions, for providing necessary inputs for bringing out the PLP that may serve as a useful tool for all the planners.

Looking forward to your valuable suggestions and feedback.

(U.D. Shirsalkar)
Chief General Manager
NABARD, Maharashtra Regional Office, Pune

Executive Summary

a. The Theme of the PLP

NABARD prepares Potential Linked Credit Plans- PLPs- to project credit potential under the priority sectors covering Primary, Secondary and Tertiary sectors. These projections are based on the parameters such as technical feasibility, availability of infrastructure, availability of exploitable resources, cropping pattern, agriculture practices and other developmental indices such as access to markets etc. PLPs also take into account the factors such as the changes in the Government's priorities and policies, strengthening of rural infrastructure, market forces, cost escalation etc. The PLP for 2019-20 has been prepared in tune with the revised Priority Sector guidelines of Reserve Bank of India, with the chapters covering Agriculture, MSME, Export Credit, Education, Housing, Social Infrastructure, Renewable Energy and Other Priority sectors.

The theme of the PLP 2019-20 is 'Adopting Sustainable Agricultural Practices'

b. District Profile

Pune district is situated in the western part of Maharashtra. It has 14 blocks with a total geographical area of 15,642 sq. km. Out of 15.62 lakh ha of the total area, the cultivable land is 9.88 lakh ha. The average rainfall of the district is 830 mm per annum. The district population (2011 Census) is 94.29 lakh with 36.78 lakh (39 %) in rural areas. Of the total land holders, 80% are small and marginal farmers (with land size less than 2 ha) holding only 43 % of the total agricultural land indicating disparity in distribution of land. The major crops grown during Kharif are Jowar, Bajra, Sugarcane, Paddy and during Rabi, wheat, gram. The cropping intensity is 130%. The CD ratio as on 31.3.2018 was 77%.

The district has also been identified for Major horticultural crops are Grapes, Pomegranate, Anjeer, Lime and Mango. Vegetables are grown under irrigation around Pune city. There are distinct hubs of industrial activities within the district. There are two Industrial Estates in the outskirts of Pune developed by MIDC. A dedicated IT hub has been set up at Hinjewadi (15 Km away from Pune towards Mumbai), which is home to all the leaders of IT sector.

c. Review of Ground Level Credit (GLC)

Total GLC of the district under priority sector was Rs 18836.66 crore during 2015-16, Rs 20750.56 crore during 2016-17, and Rs 14947.54 crore during 2017-18. The total agricultural loans issued during the last three years were of Rs 6193.53 crore, Rs 4857.56 crore and Rs 3846.94 crore respectively. The disbursements under MSME and other priority sectors during the above period were of Rs 12643.13 crore, Rs 15893.00 crore, and Rs 11100.60 crore respectively. The share of agriculture in GLC (PSL) was 26% during 2017-18.

d. Performance of credit agencies:

The district has 1313 bank branches with 1346 branches of Commercial Banks, 19 branches of Gramin Bank, 261 branches of DCCB, besides 1282 PACS affiliated to the DCCB, which cater to the credit needs of the rural population. The CD ratio as on 31 March 2018 was 77%. Achievement under ACP during 2017-18 stood at 49 % of the target.

e. Sectoral assessment of potential

The PLP has been designed with an objective of making it a meaningful link between development planning and credit planning processes. The potential under Priority Sector that could be tapped with institutional credit during the year 2019-20 has been assessed at Rs 38585.09 crore as against Rs 36616.31 crore projected for the year 2018-19 showing 5.38 % growth over the previous year.

For the year 2019-20, while the potential under crop loans has been assessed at Rs 4355.88 crore that of total agriculture loans is at Rs 7707.87 crore. The percentage of credit potential for Agriculture to total Priority Sector loans projected is 19.97 %, while that of MSME to total Priority Sector loans is 37.52 %. The sectors such as Export Credit, Education, Housing, Social Infrastructure, Renewable Energy and Others are projected at 42.50 % of total Priority Sector loans.

f. Sub-sectoral analysis-

Crop Production, Maintenance and Marketing: In the PLP prepared for the year 2019-20, the requirement of crop loan has been assessed to the tune of Rs 4355.88 crore.

Water Resources: Minor Irrigation is the major thrust area. There is need to increase investments in various activities such as deepening and renovation of wells, electric pump sets, small lift irrigation, etc. Projection of Rs 711.79crore has been estimated for MI activities.

Food and Agro Processing: Various varieties of crops, vegetables, flowers and fruits are grown in the district. Value of all these commodities can be increased by processing them locally. This will not only increase employment opportunities in the sector, but it will also give higher returns to farmers on their produce. Potential of Rs246.63crore has been identified for this sector for the year 2019-20.

MSME: Agricultural sector is, by itself, not capable of creating additional opportunities of gainful employment in the wake of increasing population. Rural Non-farm Sector activities provide opportunities for income generation utilizing local raw materials; local skills; labour and require low investments. The district is having large number of industries and a good potential exists for MSME sector. Potential of Rs 14478.20 crore is estimated which includes Rs 11604.00 crore for investment purpose and Rs 2874.20crore for working capital requirement.

Export credit, Education and Housing: Fruits, flowers, vegetables and other processed food products are exported from Pune district. There is need to promote this sector and credit linkage to be provided to the units. Keeping in view this, the potential for the export credit has been assessed as Rs335.28crore. GoI has expressed a strong commitment towards education for all of its citizens and it has been included in the priority sector. Keeping in view the potential in education sector, projection of Rs 4141.76crore is assessed for the year 2019-20. Housing has been included in the priority sector. With the rapid expansion of Pune suburban area, besides increasing urbanisation in and around block level in Pune district, the demand for housing will increase. Accordingly, projection of Rs 11232.54 crore has assessed

g. Conclusion:

Along with the refinance to Commercial, Cooperative and Regional Rural Banks against Crop loans, agricultural term loans & off-farm / other priority sector loans, and the loans to the State Govt for Rural Infrastructure Development and to other agencies, NABARD has also been extending assistance for implementing various developmental programmes in the district.

The goal of enhancement in farmers' income level can be achieved through the increased productivity/ profitability that can be attained through a proper package of sustainable agricultural practices including efficient water management and farm mechanization, use of quality seeds/ seed replacement, lesser dependence on a single crop/ crop diversification, balanced cultivation of agricultural & horticultural species, input cost reduction, reduction of post-harvest losses , prompt marketing of agricultural produce and supplementing farm income with allied activities.

Infrastructure needs such as Rural Roads, Bridges, Irrigation projects, Schools and Public Health centres, etc. are being addressed through the loans from NABARD to the State Government under Rural Infrastructure Development Fund. Also, there are certain critical infrastructure areas which can

be supported through private investment in the districts and therefore banks have to play an active role in financing such investments. Based on the observations on the constraints in various sectors, the issues/ areas have been indicated in the present document for suitable actions by the concerned Departments of the State Government as also by Bankers and other stake- holders.

NABARD, through various initiatives , has been putting emphasis on the areas such as Sustainable agricultural practices, Capital formation and productivity growth in agriculture & allied sectors aiming at doubling of farmers' income, Financial Inclusion/ Literacy, Post–Harvest infrastructure, Food and Agro Processing, Skills and Marketing, Producers Organizations and on innovative projects.

In order to achieve the overall credit potential assessed ,as also to achieve the objective of doubling the farmers' income and capital formation in Agriculture in the district, there is a need to have a coordinated approach by all the stakeholders, viz., Banks, Government Departments, NGOs and Other stakeholders. The prompt reporting system by banks through the returns under the LBS and a regular monitoring of achievements vis-à-vis the targets in DLCC/BLBC meetings assume greater importance.

For a balanced economic growth, an appropriate combination of the strategies linking credit disbursement to the potential present in various sectors of the district as envisaged in the PSL norms is required, and the same is worked out in the present PLP.

Source : Census 2011, Dept. of Agr./Dir. of Eco. & Stat., Dept. of Agr./Water Resources, BPL Survey 2002; AH Census 2012, Dir. of Animal Hus./Dir. of Eco. & Stat., District Social and Economic Survey, Pune 2017												

Predominant economic activities prevalent in the district

The geographical area of the district is 15,642 sq.km and is divided into 14 tehsils/blocks. The population of the district as per 2011 census was 94.29 lakh of which the share of rural population was at 39%. Agriculture continues to be the main occupation of the district as more than 45% of population depends on agriculture and allied activities. Out of the total operational holdings, 80% are marginal and small, occupying 43% of operational area. The Gross State Domestic Product (nominal) at current prices for 2016-17 was Rs 2257032 crore and the same is estimated for 2017-18 at Rs 2496505 crore. The per capita state income for the year 2016-17 was Rs 165491 and the same is estimated for the year 2017-18 at Rs 180596. The Gross District Value Added (GDVA) at current prices for the year 2016-17 for the district is Rs 222008 crore, whereas the per capita GDVA at current prices for the year 2016-17 for the district is Rs 225873 crore. (Source: Economic survey of Maharashtra 2017-18)

One of the predominant economic activities of the district is agriculture and allied activities. The major crops of the district are Jowar, paddy, sugarcane besides onion, potato, brinjal etc., are major vegetable crops grown. Grapes, Guava, banana etc, are main horticulture crops of the district.

Other economic activities in the district

The other economic activities of the district is employment in secondary and tertiary sector. There are several industrial estates and Micro, Small and Medium industries in the district. Pune is the second most industrialized district of the State. Besides it has emerged as IT hub with IT parks situated at Hinjewadi and other places in Pune.

Factors affecting the rural economy and development of various sectors

Due to rapid urbanization of the district and agriculture land being acquired for various projects such as Highway, Airport and industrial projects, the land under agriculture has been decreasing. With the fast expansion of Pune city, the rate of urbanization of blocks nearby has increased. With rapid expansion and urbanization the demand for housing in these blocks have been increasing.

Further, most of the agriculture is dependent on monsoon, the land under assured irrigation is comparatively less.

Around 80% of the farmers are having land holding less than 2 ha. Owing to the topography of the district and small land holdings mechanization of farm is a major hindrance in the district. Adoption to new techniques and crops is the need of the hour.

Banking Profile										
District - Pune		State - Maharashtra				Lead Bank - Bank of Maharashtra

Source : Lead Bank.										

Source : Lead Bank.

The district has banking network with 1346 branches of Commercial Banks, 19 branches of Maharashtra Gramin Bank, 261 branches of Pune DCCB and 1282 Primary Agriculture Credit Societies (PACS). Per branch population in Pune district is 3242 in comparison with State average of 7455.

The bank network of brick and motor branches is provided in most of the villages having population of 5000 & above. In the villages which are remotely located or having hilly terrain and where it is not feasible for brick and motor branches, the same are covered by BC and other modes. Almost all the villages having population of 2000 & more are covered by the BC. Thus, the branch network is found to be adequate. There is good network of Urban Cooperative Banks in the district which are catering to the needs of the people.

However, concentration of branches (more than 50%) is in semi-urban and urban areas. Bank of Maharashtra is functioning as lead bank in the district.

The ACP targets in r/o agriculture credit during the last three years are given below:

Sr. No.	Year	Targets			Achievements			(Rs lakh)
		Crop Loan	Term loan	Total Agriculture (Crop loan + Term loan)	Crop loan	Term Loan	Total Agriculture (Crop loan + Term loan)	% ach of total agriculture
1	2015-16	275209	220419	495628	392174	227178	619352	125
2	2016-17	332225	280334	612559	345156	140600	485766	79
3	2017-18	377071	312454	689525	237140	147554	384694	56

It may be observed from the above table that the target v/s achievement of ACP during the last 3 years has been uneven. It is evident from the above table that the target for crop loan as well as term loan for the year 2015-16 was achieved and the achievement was 125%. Though the target for crop loan were achieved during 2016-17, but the targets under agriculture term loans were not met 2016-17. During 2017-18, neither the targets under Crop loan nor Agriculture term loan could be achieved. The achievement under the total agriculture was meagre 56% only.

CD Ratio:

The total deposits of the banks stood at Rs 209288.95 lakh whereas the total advances stood at Rs 160862.48 lakh. Thus the CD Ratio of the district was 77% as on 31 March 2018. During the last two years as on 31 March 2017 and 31 March 2016, the CD ratio was 74 % and 76% respectively. The agency wise CD ratio as on 31.03.2018 is as follows- Commercial Banks – 78%, RRB – 83% and Pune DCCB – 56%.

Financial Inclusion: Financial inclusion is a key enabler of economic and social development. In India, a large section of the population still lives outside the ambit of formal financial services viz. credit, deposit, insurance, and pension services. In addition to bank branches, the different kind of financial services are rendered through 456 BCAs/USBs, 65 CSCs.

Prime Minister Jan DhanYojana (PMJDY):

As on 31.03.2018 in the district 13,11,353 accounts had been opened.

Social Security Schemes:

Social security schemes viz. Pradhan MantriJeevanJyotiBimaYojana (PMJJBY), Pradhan MantriSurakshaBimaYojana (PMSBY) and Atal Pension Yojana (APJ) are being implemented in the district. The progress made by banks under social security schemes in Pune district as on 31.03.2018 is as under:

	PMJJBY	PMSBY	APY
Enrolment data	530559	970662	65385

CBS project in District Central Cooperative Bank:

Pune DCCB is on CBS platform and the bank is providing various facilities such as NEFT & RTGS to its customer through its branches. Further, the bank has availed support from NABARD for implementation of CBS, Financial Literacy centres at block level. Pune DCCB has issued 2,14,000 Rupay KCC cards to the farmers.

Micro Units Development and Refinance Agency (MUDRA):

MUDRA scheme is being implemented by all the banks in the district. Banks are providing Shishu loan of uptoRs 50,000/-, Kishor loan from Rs 50,001/- to Rs 5.00 lakh and Tarun Loan from Rs 5.00 lakh uptoRs 10.00 lakh. As on 31.03.2018 Pune district was topper in amount sanctioned and disbursed under MUDRA. The progress made in respect of the scheme is given below-

(Rs Crore)

Shishu Loans		
No of A/Cs	Sanctioned Amt	Disbursement Amt
206455	591.64	589.77

Kishore Loans		
No of A/Cs	Sanctioned Amt	Disbursement Amt
34897	763.73	738.93

Tarun Loans		
No of A/Cs	Sanctioned Amt	Disbursement Amt
11858	920.83	893.97

Methodology for Preparation of Potential Linked Credit Plans (PLPs)

Potential Linked Credit Plan is a comprehensive documentation of potentials in the district for rural economic activities, both in physical and financial terms. It is also an assessment of the gaps in infrastructure support which need to be filled in to fully exploit the realizable potentials.

Sr. No.	Sector	Methodology of estimation of credit potential
1	Crop loans	- Collection of data on Gross Cropped Area for a period of 10 years and data on land holdings - Distribution of Gross Cropped Area between Small Farmer/Marginal Farmer and Other farmers based on the total land occupied by small and marginal farmers on one hand and other farmers on the other. - Make assumption to cover 100% of Small/Marginal Farmers and 20% to 50% of Other Farmers; - Study the cropping pattern - Estimation of credit potential taking into account Scale of Finance and also the KCC guidelines in vogue - Block-wise allocation of potential taking into account credit absorption capacity in a particular block, cropping pattern, etc.
2	Water Resources	- MI potential is the area that can be brought under irrigation by ground and surface water; - Collection of data on ultimate irrigation potential, area already brought under irrigation and balance potential available under groundwater and surface water for the district - While fairly clear estimates are available for ground water and its present and future utilization, surface water estimates for individual districts are difficult to get; - Estimation of potential to be attempted block-wise based on categorization of blocks, type of rock formation, suitability of MI structures, projects planned by State Govt. etc. - Preference of farmers for different MI structures like dug wells, bore wells, DCBW, etc. is to be taken into account. - The potential for MI sector is defined in terms of numbers for DW, BW and TW, and in terms of an area for lift irrigation, sprinkler and drip systems.
3	Farm Mechanisation	- The potential estimate for farm mechanization takes into account irrigated and unirrigated cropped area in the district, economic life of tractor, optimum use of tractor, per acre use of tractor, replacement of tractors per year, assessment of availability of drought animal power/power tiller by using conversion factors; - Calculation of requirement of number of tractors assuming one tractor per 30 acres and 45 acres of irrigated and unirrigated cropped area; - Adjustment of tractor potential with land holdings - Based on the cropping pattern, topography etc similar assessment is made for power tillers, combine Harvesters etc
4	Plantation and Horticulture	- Estimation of additional area that could be brought under plantation crops based on trend analysis of the land utilization pattern and cropping pattern of the district, area of cultivable waste land likely to be treated and brought under plantation crops; - Feasibility and possibility of shifting from food crops to plantation crops; - Estimation of replanting by taking into account approximate

		economic life of a few plantation crops • Estimation of potential for rejuvenation of existing plantation
5	Animal Husbandry – Dairy	• Collection of data on number of milch animals as per the latest census • Estimation of milch animals for the reference year by assuming 30% calving, 50:50 sex ratio, 40% calf mortality and 50% culling for buffaloes and 40% calving, 50:50 sex ratio, 20% calf mortality and 50% culling for CBCs and 30% calving, 50:50 sex ratio, 20% calf mortality and 50% culling for Indigenous cows; • 1/6th of the animals are assumed to be good quality animals and 60% of the good quality animals in milk and 60% of animals in milk are on 2nd and 3rd lactation. 50% of the number of animals so arrived are assumed to be animals available for bank finance.

Objectives of PLP

The objectives of PLP are

- To enable the various organizations involved in the process of rural development in directing their efforts in a planned manner, in accordance with the potentials available for exploitation.
- To enable optimum utilization of scarce financial resources (specifically bank credit) by channeling the same into sectors with growth potential.
- To assess the gaps in infrastructure support which need to be taken care for exploiting the potentials and prioritise resource requirement for the purpose.

Methodology

NABARD, in 1988-89, took initiative of preparing PLPs for agriculture and rural development. The broad strategy followed by NABARD for the formulation of PLPs envisages estimation of long term potential (in terms of physical units) in each sector of agriculture and rural development with reference to the natural and human resource endowments and a phased annual programme for development, keeping in view the relative national and state priorities. NABARD has been constantly endeavoring to introduce refinements in the methodology of preparing PLPs and improvement of its contents so that the PLPs could be used as support reference document for Annual Credit Plans of banks. NABARD has been reviewing continuously the methodology in estimation of potential through consultative process over the years. It adopts a detailed methodology for assessing the physical potential in major sectors of investment activity conducive to development of agriculture and rural areas. The PLP writers – who are District Development Managers of NABARD placed in most of the districts of the country – are supported by a group of technical officers/experts in the Regional Offices and Head Office of NABARD.

The methodology consists of assessment of sector-wise/subsector-wise estimation of potential in consultation with technical officers of the concerned line departments at the district level, identification of infrastructure facilities required to support the exploitation of the potential, identification of infrastructure facilities available at present as well as planned and working out the gap in infrastructure, examination of the trends in sector-wise credit flow, various schemes of State/Central Govt., and estimation of block-wise physical and financial credit potential.

The indicative unit costs suggested by the State level unit cost committee are made use of while arriving at the total financial outlays.

The broad methodology of arriving at the potential for major sectors is given below.

Utility

Concerted and continuous efforts have been on to make PLPs user friendly keeping in view the stakeholders focus. The document has been useful to various stakeholders in a variety of ways, as illustrated below:

1	Bankers	i. Provides inputs/information on Exploitable potential vis-a-viz credit available ii. Potential High Value Projects/Area Based schemes iii. Infrastructure support available which can form basis for their business/development plans.
2	Government Agencies/ Departments	i. Developmental infrastructure required to support credit flow for tapping the exploitable potential ii. Other support required to increase credit flow iii. Identification of sectors for Government sponsored programme
3	Individual/ entities Business	i. Private investment opportunities available in each sector ii. Commercial infrastructure iii. Information on various schemes of Govt & Banks.

Limitations and constraints

Though concerted efforts are being made to estimate the potentials realistically, the following limitations and constraints are noticed in the exercise of PLP preparation:

- Non-Availability of accurate granular data on credit flow – Sector and sub-sector-wise;
- Non-availability of data required for estimation of potential in some sectors from the line Depts.

Chapter 1

Important Policies and Developments

1.1 Policy Initiatives - Government of India

Following important announcements have been made in Union Budget 2018-19 for agriculture and farmers' welfare:

- Agriculture production in the country during the year 2016-17 achieved a record food grain production of around 275 million tonnes and around 300 million tonnes of fruits and vegetables.
- For the year 2018-19, the target set for agriculture credit is Rs.11 lakh crore.
- An Agri-Market Infrastructure Fund with a corpus of Rs.2000 crore will be set up for developing and upgrading agricultural marketing infrastructure in the 22000 Grameen Agricultural Markets and 585 APMCs.
- GoI will be setting up a Fisheries and Aquaculture Infrastructure Development Fund for fisheries sector and an Animal Husbandry Infrastructure Development Fund for financing infrastructure requirement of animal husbandry sector. Total Corpus of these two new Funds would be Rs.10,000 crore.
- Government has decided to keep Minimum Support Price for the all unannounced crops of kharif at least at one and half times of their production cost.
- Organic farming by Farmer Producer Organizations (FPOs) and Village Producers' Organizations (VPOs) in large clusters, preferably of 1000 hectares each, will be encouraged. Women Self Help Groups (SHGs) will also be encouraged to take up organic agriculture in clusters under National Rural Livelihood Programme.
- "Operation Greens" shall promote FPOs, agri-logistics, processing facilities and professional management.
- To realize the agri-export potential, export of agri-commodities will be liberalized. Government will also set up state-of-the-art testing facilities in all the forty-two Mega Food Parks.
- GoI will launch a Re-structured National Bamboo Mission with an outlay of Rs.1290 crore to promote bamboo sector in a holistic manner.
- GoI has now allowed hundred per cent deduction to the companies registered as Farmer Producer Companies and having annual turnover up to Rs.100 crores in respect of their profit derived from such activities for a period of five years from financial year 2018-19.
- Under Prime Minister Awas Scheme (Rural), 51 lakh houses in year 2017-18 and 51 lakh houses during 2018-19 which is more than one crore houses will be constructed exclusively in rural areas.
- Ground water irrigation scheme under Prime Minister Krishi Sinchai Yojna- Har Khetko Pani will be taken up in 96 deprived irrigation districts where less than 30% of the land holdings get assured irrigation presently.

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.2 Policy Initiatives – Reserve Bank of India

The following major initiatives have been taken by RBI:

- Compendium of Guidelines on Financial Inclusion and Development issued to all Small Finance Banks vide circular dated July 6, 2017.
- National Rural Livelihoods Mission (DAY-NRLM) - Aajeevika - Interest Subvention Scheme addressed to all Public and Private Sector Banks vide circular dated October 18, 2017.

- Action Points for SLBC Convenor Banks/ Lead Bank addressed to all Lead Banks vide circular dated April 6, 2018 so that Lead Banks go the extra mile to provide facilities over and above the bare minimum to these critical field functionaries.
- Action Points for SLBC Convenor Banks/ Lead Bank addressed to all Lead Banks vide circular dated April 6, 2018 to focus on policy issues.
- Revised guidelines on lending to Priority Sector for Primary (Urban) Co-operative Banks issued, vide circular dated May 10, 2018.
- Instructions issued vide circular dated June 6, 2018 to all banks and NBFCs regulated by the Reserve Bank of India to temporarily allow banks and NBFCs to classify their exposure, as per the 180 days past due criterion, to all MSMEs, including those not registered under GST, as a 'standard' asset, subject to the certain conditions.
- Circular dated June 19, 2018 issued to all Scheduled Commercial Banks (Excluding Regional Rural Banks and Small Finance Banks) prescribing eligibility criteria of housing loans for classification under priority sector.
- Master Circular – Lead Bank Scheme - Issued to all the SLBC Convenor Banks/Lead Banks vide circular dated July 02, 2018.
- Master Circular- Credit Facilities to Minority Communities addressed to All Scheduled Commercial Banks & Small Finance Banks (Excluding RRBs and Foreign banks with less than 20 branches) issued vide circular dated July 02, 2018.
- Master Circular on SHG-Bank Linkage Programme issued to all Scheduled Commercial Banks - Issued vide circular dated July 02, 2018.
- Master Circular - Kisan Credit Card (KCC) Scheme - Issued to All Scheduled Commercial Banks (including Small Finance Banks and excluding RRBs) vide circular dated July 4, 2018. The scheme provides broad guidelines to banks for operationalizing the KCC scheme. Implementing banks will have the discretion to adopt the same to suit institution/location specific requirements.

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.3 Policy Initiatives - NABARD

1.3.1 Long-Term Refinance

To ensure increased and uninterrupted credit flow to farmers, as also to give a boost to capital formation in agriculture sector NABARD provides refinance to the cooperative banks and RRBs out of Long Term Rural Credit Fund, at a reasonable rate of interest. An amount of Rs. 15,000 crore has been allocated for the year 2018-19.

1.3.2 Short-Term Refinance

Short Term Cooperative Rural Credit - STCRC (Refinance) Fund has been set up in NABARD to provide Short Term refinance to Cooperatives for their crop loan lending. The allocation for the year 2018-19 is Rs.45,000 crore. Short Term RRB (Refinance) Fund has been set up in NABARD to provide Short Term refinance to RRBs for their crop loan lending. The allocation for the year 2018-19 is Rs.10,000 crore.

1.3.3 Rural Infrastructure Development Fund (RIDF)

The corpus under RIDF is announced every year by GoI/RBI and for the year 2018-19, a corpus of Rs. 28,000 crore has been allocated.

1.3.4 Long-Term Irrigation Fund (LTIF)

The Long-Term Irrigation Fund (LTIF) set up in NABARD with an initial corpus of Rs.20,000 crore for funding 99 irrigation projects during 2016-17 following announcement in the Union Budget, was

further supplemented with additional allocation of Rs.20,000 crore in 2017-18 and Rs.15,000 crore in 2018-19.

In addition to the 99 projects, two more projects namely Polavaram National Project from Andhra Pradesh and North Koel Reservoir Project from Bihar and Jharkhand were included for funding under LTIF.

1.3.5 Dairy Processing and Infrastructure Development Fund (DIDF)

In the Union Budget 2017-18, Government of India announced creation of Dairy Processing and Infrastructure Development Fund (DIDF) with a total corpus of Rs.8000 crore over a period of 3 years (2017-18 to 2019-20). The Operational Guidelines were issued by GoI on 21 December 2017.

1.3.6 Digitization of SHGs under EShakti project

The project is in operation in 100 districts spread over 22 States and one UT as on 31 March 2018 and is expected to digitise 4.5 lakh SHGs benefiting around 54 lakh rural poor. As on 31 March 2018, a total of 3,49,432 SHGs were digitized involving 38,36,014 members across the country.

1.3.7 Financial Inclusion

A Financial Inclusion Fund (FIF) has been set up in NABARD with a view to take up developmental and promotional interventions to secure greater financial inclusion and support suitable technology and innovations. Many new initiatives are taken under the Fund.

- Supporting Banks for obtaining Membership of Authentication User Agency (AUA) / KYC User Agency (KUA) facilities of UIDAI and setting up infrastructure.
- Support for deployment of mobile signal booster in grey areas SSAs in lieu of VSAT sanctioned earlier.
- BHIM Aadhaar Merchant Incentive Scheme
- BHIM Cash Back Scheme for Individuals
- Dual Authentication at BC points for SHG transactions
- Support to RCB's for on-boarding Public Financial Management System" (PFMS): - Guidelines have been issued to RCBs extending support under FIF for on-boarding PFMS platform.
- Deployment of 20 lakh BHIM Aadhaar Pay Devices
- Aadhaar Enrolment and Update Centres
- Support for on-boarding to BHIM UPI Platform to RRBs and RCBs to provide better services while making banking transactions.

1.3.8 Climate Change

- ✓ Adaptation Fund - NABARD was reaccredited as the National Implementing Entity (NIE) by the Adaptation Fund under UNCCC, the reaccreditation would be valid up to December 2022.
- ✓ Green Climate Fund - India's first Private sector facility proposal "Line of credit for Solar Rooftop Segment for commercial, industrial and residential housing sectors" with an outlay of USD 250 million and GCF loan of USD 100 million was sanctioned. One project on 'Ground Water Resurgence and Solar Pumping System to ensure food security and enhance resilience in vulnerable tribal areas of Odisha" with outlay of USD 34.357 million was sanctioned.
- ✓ National Adaptation Fund for Climate Change - During 2017-18 the National Steering Committee on Climate Change (NSCCC) of MoEFCC accorded sanction to 06 projects including one regional project on "Crop Residue Management" developed by NABARD covering Punjab, Haryana, Rajasthan and Uttar Pradesh to address the crop residue burning and co sequential negative impacts. In order to make available information on projects being implemented, NABGREEN was developed as portal linked to the website of NABARD.

1.3.9 Farm Sector Policy– improvements

- ✓ National Level Farmers' Consultative Group was instituted during 2017-18 as a forum for interaction with farmers at the national level. First meeting of the NLFCG was held on 09 February 2018 with participation of farmer members from 20 states.
- ✓ A consultation workshop with Commodity Boards was organized to facilitate coordinated efforts towards enhancing income of farmers.
- ✓ In order to facilitate revival of millets especially as part of climate resilient agriculture for dry lands action research projects was initiated in the states of Karnataka and Madhya Pradesh.
- ✓ KrishakSarathi portal for digitisation of Farmers' clubs was initiated to facilitate development of a database of farmers, aid in monitoring activities of the Farmers' clubs and ensure their sustainability in the long run. Over 23,000 Farmers' Clubs have been digitized during the year.
- ✓ KrishakSamriddhi- an income enhancement initiative- Five action research projects on enhancing income of farmers were initiated in five states viz. Gujarat, Haryana, Odisha, Bihar and Assam.

1.3.10 Off Farm Sector Initiatives

- ✓ The corpus of GramyaVikasNidhi has since been enhanced to Rs.40 crore during the year 2017-18.
- ✓ NABARD took the initiative of providing financial assistance and other need based support in establishment of 'new' Agri Business Incubation Centres (ABICs) in Government Agriculture Universities/Government Agriculture Colleges across India.
- ✓ With a view to generating fresh ideas for invigorating the handloom sector, NABARD held a "National Seminar on Handloom" at Head Office in Mumbai on 19 January 2018.

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.4 Government of India Sponsored Programmes with Bank Credit

The Administrative approval conveying the continuation of the following subsidy schemes for 2018-19 has been received from GoI:

- Agri Clinics and Agri Business Centres Scheme
- Dairy Entrepreneurship Development Scheme
- National Livestock Mission
- Stand Up India Scheme

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.5 Sustainable Agricultural Practices

1.5.1 Major Adaptation and Mitigation Strategies

- ✓ Generation for Renewable Energy of 175 GW by 2022.
- ✓ National Solar Mission scaled up by 100 GW by 2022.
- ✓ National Smart Grid Mission launched for efficient T & D network.
- ✓ Launched Smart Cities Mission to develop new generation cities by building a clean and sustainable environment.
- ✓ Atal Mission for Rejuvenation and Urban Transformation (AMRUT) is a new urban renewal mission for 500 cities across India.
- ✓ Launched one-of-its kind 'Swachh Bharat Mission' (Clean India Mission)
- ✓ Formulated Green Highways (Plantation & Maintenance) Policy to develop long "tree-line" along both sides of national highways.
- ✓ Launched Soil Health Card Scheme to all farmers.
- ✓ ParamparagatKrishiVikasYojana launched to promote organic farming practices.

- ✓ Pradhan Mantri Krishi Sinchayee Yojana launched to promote efficient irrigation practices.

1.5.2 Sustainable Agriculture – Meaning and Key Principles: Sustainable agriculture is the production of food, fibre or other plant or animal products using farming techniques that protect the environment, public health, human communities and animal welfare. In other words, Sustainable agriculture can be understood as an ecosystem approach to agriculture. The most important factors for agriculture farm are sun, air, soil, nutrients, and water. The water and soil quality and quantity are most amenable to human intervention through time and labour. Sustainable agriculture means those farming practices which are sustainable for longer time period for identified location and developed by understanding of ecosystem services, relationships between organisms and their environment.

1.5.3 Sustainable Agriculture Practices

- ❖ Improvement in soil fertility through crop residue management, green manuring, crop rotation and mixed cropping
- ❖ Adoption of Integrated Farming System (Dairy + Crop Production + Horticulture, etc.) for efficient use of natural resources
- ❖ Adoption of water management practices as per water availability and increase in output productivity on per unit basis.
- ❖ Adoption of Sustainable agricultural practices such as conservation agriculture (zero tillage), crop rotation, mixed cropping, mulching, etc.
- ❖ Adoption of Integrated Nutrient & Pest management

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.6 Policy Initiatives – State Government

Following important announcements have been made in the State Budget (2018-19) for agriculture and farmers' welfare:

- Provision of Rs. 3115.21 crore to 26 projects in the State under the Pradhan Mantri Krishi Sinchayee Yojana in 2018-19.
- A special provision of Rs. 1500 crore for Jalyukta Shivar Abhiyan.
- A provision of Rs. 160 crore for wells and farm ponds and Rs. 432 crore for micro irrigation projects.
- A new scheme namely 'Chief Minister Agriculture and Food Processing Scheme' with a provision of Rs 50 crore.
- A provision of Rs 100 crore for Organic Farming .
- A provision of Rs 750 crore for giving electric connections to 93322 agricultural pumps.
- 145 major market committees in the State are proposed to be brought under E-National Agriculture Market (e-Nam) portal with an expected allocation of Rs 9 Crore from the Central Government in 2018-19.
- Under "Pramod Mahajan Skill and Entrepreneurship Development Mission" which has been under implementation since 2015, in the next five years, there is a plan to provide skill development training to 10,31,000 candidates.
- During the financial year 2018-19, State Government has made a provision of Rs. 10,828 crore for road construction in the State.
- Under Mukhyamantri Gram Sadak Yojna , a provision of Rs 2558.40 crore is made for construction of road length of 7000 kms in the State.
- The Government has taken a decision to supply power for 12 hours in a day to 40 lakh farmers in the State and a provision of Rs 375 crore is made under Mukhyamantri Saur Krishi Vahini.

- To promote handicrafts and to preserve traditional industry in the State ,an outlay of Rs 4.28 crore is made .
 - It is proposed to set up a 'citrus estate' which will be implemented in stages in Nagpur, Amravati and Akola districts with a sum of Rs 15 crore.
 - The State Government has decided to implement Chief Minister Rural Sewerage Processing and Management Project in the villages having population of 15000 or more with a provision of Rs 335 crore .
- Other initiatives – DRIP in Sugarcane cultivation, MAHA-FPC, Payment to farmers at MSP

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.7 State Government Sponsored Programmes with Bank Credit

Details of various state government sponsored schemes are given below:

- Group Farming Scheme
- MagelTyalaShet Tale Yojna
- Dr BabasahebAmbedkarKrishiSwavalambanYojna
- BirsaMundaKrishiKrantiYojna
- 02 Milch animals distribution to scheduled caste beneficiaries
- Fodder Supply to livestock of scheduled caste beneficiaries.
- 10 + 1 goat distribution to the beneficiaries of scheduled castes
- Integrated Poultry Development Scheme
- Genetic improvement programme to increase productivity of cows/buffaloes of the State
- Kamdhenu village adoption scheme (Community benefit scheme)
- Encouraging fodder development
- Navinyapoorna scheme -06/04/02 milch animal - group distribution scheme
- Navinyapoorna scheme – Semi : Stall-fed 10 + 1 goat distribution
- Navinyapoorna scheme –Rearing 1000 broiler birds.
- Prime Minister Employment Generation Programme
- Seed money (Margin money scheme) of District Industries Centre
- Special Central Assistance scheme of Mahatma Phule Backward Class Development Corporation
- Margin money scheme of SantRohidasCharmodyog&CharmkarVikasMahamandal
- State Corporation Scheme – LokshahirAnnabahuSathe Development Corporation
- Margin Money Scheme – VimuktaJati and Nomadic Tribe Development Corporation
- Seed money scheme – Maharashtra State Other Backward Class Development Corporation
- Special Component Plan – Maharashtra State Khadi& Village Industries Board
- District Industries Centre Loan scheme for tiny industries

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

1.8 Sustainable Agriculture Practices in the State- Mitigation and adaptation strategies for the State

SOME INITIATIVES IN MAHARASHTRA TOWARDS ADOPTING SUSTAINABLE AGRICULTURE PRACTICES WITH SUPPORT OF NABARD

S.N.	Activity	District
1	Watershed development aiming at conservation of water.	Ahmednagar, Aurangabad, Beed,Nagpur, Nanded, Nandurbar, Nasik,Yavatmal, Jalna, Hingoli, Buldhana, Parbhani, Wardha, Latur,

		Satara, Pune, Dhule, Osmanabad
2	Sustainable Development Programme in watersheds	Ahmednagar, Amravati, Beed, Buldhana, Dhule, Jalgaon, Jalna, Nanded, Nandurbar, Nasik, Pune, Satara, Yavatmal
3	Campaign on efficient use of water	Kolhapur, Sangli, Solapur, Ahmednagar, Osmanabad, Aurangabad, Nandurbar, Washim, Nagpur, Yavatmal
4	Plantation of horticultural crops in Wadis of the tribal community	Ahmednagar, Akola, Amravati, Bhandara, Dhule, Gadchiroli, Gondia, Hingoli, Nasik, Nagpur, Palghar, Wardha, Pune, Washim, Nandurbar, Buldhana, Chandrapur, Nanded
5	Innovative infrastructure projects for improving availability of water	Amravati, Aurangabad, Wardha
6	Collective purchase and marketing of agricultural produce by FPOs	Ahmednagar, Beed, Buldhana, Aurangabad, Jalgaon, Latur, Nagpur, Osmanabad&Washim
7	Climate proofing and climate change adaptation measures	Ahmednagar, Dhule, Jalna, Nasik, Beed, Pune, Satara, Wardha, Yavatmal
8	Efficient management of natural resources for sustainable agricultural practices-(Organic Farming-Vermicomposting- Integrated Farming-Biogas Plant- Conversion of Agricultural waste into value added products etc.)	Aurangabad, Beed, Dhule, Kolhapur, Satara, Sindhudurg, Solapur, Wardha, Washim
9	Sustainable production of cotton	Aurangabad
10	Capacity building for adoption of technologies in agriculture	Buldhana , Sangli
11	Green fodder technologies- (Cultivation of Napier-Bajra Hybrid-- Azolla cultivation)	Chandrapur
12	System of Turmeric intensification	Chandrapur
13	Bandhara construction for storage of water	Gadchiroli
14	Lac production, processing and marketing as a livelihood enterprise	Gondia
15	Soil health project- use of bio-inputs in a block model and crop area wise planning of water	Jalna
16	DRIP in Sugarcane to promote efficient use of water and to minimise wastage	Kolhapur
17	Probiotic microorganisms for agriculture	Nasik
18	Farm ponds and integrated farming (vegetable cultivation) & fish farming	Palghar
19	Biogas and integrated activities	Sindhudurg
20	Soil protection and rehabilitation for food security , and Solar fencing to prevent farm losses due to wild animals	Yavatmal

(For detailed paper visit <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>)

Chapter 2 Credit potentials for Agriculture

2.1 Farm Credit

2.1.1 Crop Production, Maintenance and Marketing

2.1.1.1 Introduction:

Farm credit includes loans to farmers for pre and post-harvest activities, viz., spraying, weeding, harvesting, sorting, grading and transporting of their own farm produce. It also includes loans to farmers up to Rs 0.50 lakh against pledge/hypothecation of agricultural produce (including warehouse receipts) for a period not exceeding 12 months, loans to distressed farmers indebted to non-institutional lenders, crop loans to farmers which will include traditional/non-traditional plantations, horticulture, allied activities and medium and long-term loans to farmers for purchase of agricultural implements and machinery, loans for irrigation and other developmental activities undertaken in the farm, and developmental loans for allied activities.

The district has a moderate climate throughout the year although summer is warmer. Agro climatically, the district falls in the Western Ghat Region. The district receives its rainfall mainly from the southwest monsoon spread between June to September. Areas in western parts receive rainfall as high as 3000 to 4000 mm while it is scanty at 680 mm in the east and far eastern parts of the district.

Predominance of small and marginal farmers (80%) is indicative of the need for timely and adequate supply of credit for achieving higher production and productivity. Rice, jawar, bajra, sugarcane, groundnut and sunflower are the main crops grown in Pune district. Among the vegetables, onion, potato, tomato, carrot, garlic, yams, sweet potato, radish etc., are grown extensively in Pune. Sugarcane is one of the important cash crops of Pune. This district has 12 sugar mills in Indapur, Haveli, Baramati, Shirur, Mulshi, Bhore, Junnar, Bhore and Daund Talukas.

2.1.1.2. Gol scheme on Interest Subvention for crop loans : Interest Subvention (IS) @ 2% is provided to the banks to enable them to lend at 7%, further 3% of interest subvention is provided for the farmers repaying their dues promptly.

State Govt scheme on Interest Subvention

In addition to Gol interest subvention scheme, Government of Maharashtra is also extending interest subvention to banks @1% to enable them to finance @6%. It also extends interest rebate to farmers on prompt repayment as follows - farmers availing crop loan upto Rs1,00,000 will get 3% interest subvention on prompt repayment and farmers availing crop loans above Rs1.00 lakh and upto Rs3 lakh, will get interest subvention of 3% for the amount of Rs 100,000 and 2% for the remaining amount i.e above Rs1 lakh to Rs 3 lakh. Effectively, under both the schemes put together, in Maharashtra, the prompt repaying farmers get crop loan upto Rs1 lakh @ 0% and if the loan is upto Rs3 lakh, then upto Rs1 lakh @ 0% and @ 1% for the portion between Rs1 lakh to upto Rs3 lakh. Ground Level Credit Flow under Crop production, Maintenance and Marketing during the year 2015-16, 2016-17 and 2017-18 was Rs 3921.74 crore, Rs 3451.56 crore and Rs 2371.40 crore respectively.

2.1.1.3 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr.No.	Name of the Crop	Unit (No./Ha)	Scale of Finance	Physical Units	Bank Loan
1	Paddy	ha.	0.48	51000	24480.00
2	Jowar	ha.	0.26	260000	67600.00
3	Bajra	ha.	0.25	42000	10500.00
4	Ragi	ha.	0.28	2500	700.00

5	Maize	ha.	0.28	39000	10920.00
6	Tur	ha.	0.30	2200	660.00
7	Moong	ha.	0.18	10000	1800.00
8	Groundnuts	ha.	0.38	16500	6270.00
9	Soyabean	ha.	0.36	16000	5760.00
10	Fodder Crops	ha.	0.30	54000	16200.00
11	Onion	ha.	0.65	44000	28600.00
12	Vegetables	ha.	0.30	74000	22200.00
13	Wheat	ha.	0.33	40000	13200.00
14	Gram	ha.	0.27	38000	10260.00
15	Sugarcane	ha.	1.15	98400	113160.00
16	Other Cereals	ha.	0.22	900.00	198.00
17	Other Pulses	ha.	0.22	10000.00	2200.00
18	Other Oilseeds	ha.	0.24	1500.00	360.00
Sub -Total					335068.00
	Post Harvest /Household consumption requirements		10% of the Sub total		33506.80
	Repairs and Maintenance expenses of farm assets		20% of the Sub total		67013.60
Grand Total					435588.40

2.1.1.4 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

Availability of Infrastructure

The district is very well developed in terms of infrastructure required for pursuing farming.

- The seeds are being supplied through network of marketing societies, private distributors as also by the Agriculture Department to small and marginal farmers. The District Administration is ensuring timely supply of inputs to farmers.
- Marketing support is adequately available in the district. There are 13 regulated markets, 35 sub market yards/mandis, providing various marketing facilities to farmers. Transport and communication arrangements are adequately developed for marketing of agricultural produce.
- Processing and storage facilities are also available within the district. Many new infrastructure processing and storage facilities have come up in the district.
- The district has adequate and effective network of extension services. Besides the Agricultural Department, and the Zilla Parishad (ZP), extension facilities are also available through the Agriculture College, Pune and Krishi Vigyan Kendras (KVKs). District Superintendent Agriculture Officer is catering to extension needs of farmers through a team of technically qualified Sub-Divisional Agriculture Officers and Taluka Agriculture Officers.
- Various Central/State Government sponsored programs, aimed at improving production and productivity in agriculture, are under implementation in the district. These include Food Security Programme (Rice, Grains and Pulses), dry land farming, farm mechanization, P.P.P. Maize, fodder development etc., are provided to farmers at subsidized rates.
- There are more than 300 Farmers Clubs sponsored by banks and KVK. These clubs have to be activated for externalizing extension work effectively. The KVKs should educate more farmers about the proven technology of different crops through CAT programmes funded by NABARD.
- Interest Subvention Scheme is being implemented by GoI & State Govt. to reduce burden of interest on farmers.
- KCCs:** The number of Rupay KCC cards issued in the State by the Pune DCCB as on 31 March 2018 are 2,14,000.

2.1.1.5 Action points/issues to be addressed

- Banks may take initiative so that farmers may be encouraged to avail Marketing Credit, especially in respect of crops that can be stored and fetch better prices during postharvest period.
- Banks may encourage and motivate the farmers to avail agriculture term loan for sustainable agriculture.
- Banks may issue KCC to all borrowing farmers and educate all farmers to derive optimum benefits through KCC scheme under new guidelines. Banks may make also use of Farmers' Club for this purpose.
- In view of huge cost expected to be involved in developing infrastructure for agriculture, there is a need to encourage collaboration with private sector for creation of non-commercial and long term infrastructure in farm sector. The concept of Public –Private Participation should be encouraged. Accordingly bank finance should be made available for private investment in agriculture infrastructure.
- Improve productivity through green manuring, introduction of mechanisation, soil testing, and Integrated Nutrient management, use of bio-fertilizers / bio pesticides; and reducing effects of chemical waste /gases on crops.
- Create awareness about cost reduction through integrated pest management, increasing cropping intensity, interaction with Experts, quality control, proper use of seeds, fertilizers & pesticides.
- Develop scientific system of collection, grading, packing and standardization of quality etc. of vegetables, fruit crops. Farmers may be trained for undertaking medicinal /herbal plants, Green Houses tech. and Agro processing activities.
- In order to ensure better Seeds replacement ratio, maintain N, P, K ratio of chemical fertilizers, make use of pesticides scientifically and increase the coverage under organic fertilizers Agri. Dept may involve KVKs, Agri. Colleges, Farmers' Clubs etc., to create awareness amongst farmers.
- Impress upon the farmers on the undesirable consequences of erosion in soil productivity due to excessive use of Urea.
- Efforts to open more depots for distribution of seeds, fertilizers, pesticides etc.
- Energisation of irrigation pump sets needs to be given top priority. This should be backed by regular and assured supply of power. Farmers may be encouraged to create on farm rain harvesting structures.
- Extension machinery of State Government to focus on creating awareness about benefits of soil and water conservation measures.
- Contract farming/Group farming has been taking roots in the district. There is a need to enlarge scope of Contract Farming to cover more crops.

Chapter 2.1.2 Water Resources

2.1.2.1 Introduction:

Irrigation projects are covered under three major headings, viz., Major irrigation (command area more than 10,000 ha), Medium irrigation (command area between 2,000 to 10,000 ha) and Minor irrigation (command area less than 2,000 ha).

The average rainfall in the district is around 830 mm. Pune district has a net cropped area of 8.63 lakh ha. The net irrigated area of 2.69 lakh ha constitutes 31.17% of the net cropped area. Irrigation by groundwater sources i.e. wells accounts for 1.45 lakh ha (53.90%) while surface water systems constitute 1.24 lakh ha (46.09%). The cropping intensity is 130 % and in irrigated area 149%. Thus,

Ground water is the major source of irrigation. However, large number of ground water structures are either dried up or are poor yielding.

The stage of ground water development in the district varies from 7.90% at Velhe to 95.22% at Baramati. The overall stage of ground water development in the district is 73.05%. The watershed wise assessment has been done for the district and out of 71 watersheds assessed, 52 watersheds fall under “Safe” category, 7 fall under over-exploited 12 fall in “Semi-Critical”. Two talukas viz., Baramati and Purandhar come under “Semi-Critical” category, where future ground water development is not recommended without adhering to the precautionary measures i.e., artificial recharge to augment the ground water resources and adoption of ground water management practices. All the talukas, depending on the watershed, have villages falling into different categories (safe/ over-exploited/ semi-critical).

The district forms part of Western Ghat and Deccan Plateau. Physiographically the district can be divided into three distinct belts i.e., (1) The western belt stretching from 16 to 31 km. east of Sahayadri –an extremely rugged country cut by deep valleys, divided and crossed by hill ranges, with negligible groundwater availability (2) The central belt extending for about 30 km. east of the western belt across the tract whose eastern boundary is roughly marked by a line drawn from Pabal in the north, southwards through Pune to Purandhar. In this belt a series of small hills stretch in to valleys and large spurs from Plateau, with moderate groundwater availability and (3) The eastern belt with a rolling topography and the low hills sinking slowly in to the plains with relatively broader valleys, with good groundwater availability.

The district has three major drainage system namely (i) The Bhima –Ghod River system in the northern, north eastern and eastern part, of which Bhima River has a total length of about 355 km. and Ghod River has a drainage of about 196 km. in the district (ii) Mula –Mutha River system covering the central part and have a total length of 242 km. in the district. (iii) Nira River system covering the south, south east and eastern part and has a total length of about 231 km. The other important rivers that are flowing through the district are Andhra, Karna, Shivganga, Pushpavati, Pauna and Indrayani. All the rivers have mostly semi-dendritic drainage pattern and the drainage density is quite high.

There is a vast area under sugarcane and horticulture crops which is indicative of potential available for drip irrigation in the district. Further, limited availability of assured irrigation water and vast area under dry land farming are indicative of the need to increase water-use efficiency by adopting micro irrigation and cultivating high value crops in their command so that surplus water can be used for other crops. By adopting sprinkler and drip irrigation systems, 28 to 56 % economy can be expected in the quantity of water consumption, which in turn enables to bring 25 to 40 % additional area under irrigation. Moreover, it reduces the extent of soil erosion, increases efficiency of fertilizers, reduces the damages through pests and consequently, enhances the crop production by 12 to 31 % depending upon the crop.

Ground Level Credit Flow under Water Resources during the year 2015-16, 2016-17 and 2017-18 was Rs 28646.11 lakh, Rs 16643.56 lakh and Rs 19804.29 lakh respectively.

In view of the need for judicious and appropriate use of water for cultivation of agricultural produce, potential available and ground level credit the potential revised upwards for micro irrigation practices.

2.1.2.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

S.N	Activity	Unit (Nos/ha)	Unit Cost	Physical Units	TFO	Bank loan
1	Dug wells/new wells	No	1.30	3700	4810.00	4329.00
2	Borewells	No	0.33	3100	1023.00	920.70
3	Pumpset (5 HP submersible)	No	0.55	9800	5390.00	4851.00

4	Pumpset(7.5 HP electric)	No	0.35	6500	2275.00	2047.50
5	Drip Set (1.40 x 0.60 x 0.30 m)	Ha.	1.00	33300	33300.00	16650.00
6	Sprinkler Set (75 mm HDPE)	Ha.	0.30	21000	6300.00	3150.00
7	Lift Irrigation (Big)	No	1.32	23300	30756.00	27680.40
8	Lift Irrigation (Small)	No	0.36	16900	6084.00	5475.60
9	Pipeline System (75 mm HDPE)	100 mt	0.30	22500	6750.00	6075.00
Total						71179.20

2.1.2.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

In the district, there are 16 major, 9 medium and 169 minor irrigation projects. Though there is a State Government Act enforcing the formation of Water Users' Association to take over the Irrigation Structures created, the participation of WUA in the irrigation command is very poor.

Introduction of water saving irrigation methods in Lift Irrigated Command Area

Water has become a scarce input for agriculture. One of the reasons for failures of Lift Irrigation schemes is due to the less water availability in the source. This can be overcome only when efficient management of available water in the source is ensured. There is a vast scope for bringing more area under irrigation through efficient management of available water through drip/sprinkler irrigation under lift irrigated command area. The lift irrigation schemes should preferably be planned with drip or sprinkler irrigation system. (Action: Water Resources Dept and Horticulture Dept).

2.1.2.4 Suggested Action Points –

- Concerted efforts should be made by agriculture department to popularize Drip/Sprinkler irrigation systems (especially in the command area of LI Schemes), lining of field channels, use of underground pipelines etc., to ensure optimum utilization of water resources. The Govt may promote drip and sprinkler irrigation aggressively in view of the depleting water resources
- There is need to increase water-use efficiency of lift irrigation schemes. There is need to revive the Co-operative Lift Irrigation Schemes so that the expenditure already incurred does not become infructuous. (Action by Irrigation department)
- Artificial recharge measures through construction of rain water harvesting structures like rain water storage tanks, percolation tanks, farm ponds, check dams etc. to be undertaken. Also the existing percolation tanks and village ponds need to be rejuvenated to act both as water conservation and artificial recharge structures. (Action by State Govt.)
- The Agriculture Universities and KVKs may be involved for educating farmers for growing short duration, less water consuming crops so as to increase their income generating capacity. (Action by Agri Universities and KVK)
- Rain water in many parts of the district flows as runoff due to natural physiography. An efficient utilization of this rainfall through rain harvesting structures can ensure availability of water for irrigation during dry seasons. (Action by State Govt.)
- Scope exists for construction of suitable artificial recharge structures in the district. The structures recommended particularly for the hilly area in the west and northwestern part are contour bunds, gully plugs, nala bunds and check dams etc. For other hard rock areas of the district, nala bunds, check dam, KT weirs and percolation tanks at suitable sites are suggested. The existing dugwells may also be used for artificial recharge of ground water by ensuring that the water used for recharge should be free from silt and other impurities. (Action by State Govt.)

- To enhance the ground water resources and for sustainable development, mass awareness programmes should be organized in large scale by district administration. Such programmes are necessary so as to educate the user regarding yielding capacity of aquifer and declining trend of water levels in the district. Similarly farmer should also be encouraged to adopt appropriate crop planning and irrigation practices. (Action by State Govt.)

Lift Irrigation lifts up the income

The village Hadsar is in Junnar Taluka of the Pune District, situated on the foothills of the Hadsar Fort, and in the catchment of Manikdoh Dam. Lupin Human Welfare & Research Foundation (LHWRF) has implemented Tribal Development Program (Wadi Approach) with support from NABARD during the period 2008 to 2017. Earlier, the entire land was rainfed even though the back water of dam was available nearer to their fields. No other water sources were available in the village which could bring the area under irrigation. Farmers used to cultivate the paddy crop in the kharif season and few farmers used to cultivate wheat & gram crops during the rabi season due to in-situ soil moisture situations. The earnings of the family from the farm was not enough to meet the family requirements. These circumstances forced them to migrate to nearby places in search of daily wages. About 80% farmers of the village used to migrate daily at Bankarphata about 25 km away from village to work as a farm labour.

The fields of the farmers at higher elevations needed water lifting mechanism to lift the water from the Manikdoh dam. LHWRF discussed the issue with the Village Planning Committee and the farmers and suggested them to form homogenous groups of 5-6 farmers to implement the lift irrigation from dam into their respective fields. They were encouraged to do the shramdan for laying of pipeline, which would help to reduce the cost involved in installing the LIS. The remaining cost of material (Pump, Starter, Pipe line and other accessories) was planned on 50% sharing basis i.e 50% from project and remaining 50% from group. Farmers agreed upon this and took 1-2 months to collect their contribution. Meanwhile technical survey was done by LHWRF for feasibility analysis and to work out the cost estimates. Five small LIS are installed in the village which has helped 30 tribal farmers to bring their 65 acre land under assured irrigation.

The farmers which used to cultivate only rainfed crops are now cultivating the crops throughout the year like (Beans, Coriander, Fenugreek, Cucumber and Potato) along with main crops instead of migrating outside for their livelihood. Earlier, the average annual income of a farmers reportedly was in the range of Rs 25000/- to Rs 30000/-, which has now reportedly crossed Rs 70000/- . These farmers have also started establishing dairy andgoatry units as a supplementary source of income.

Chapter 2.1.3 Farm Mechanization

2.1.3.1 Introduction:

Farm Mechanisation (FM) activities play a critical role in ensuring efficient use of scarce resources in agricultural operations and help making the whole activity competitive. Besides facilitating and ensuring timeliness, thoroughness and cost effectiveness of agricultural operations, it contributes to improving the quality of life of rural work force and farm families. It helps in reduction of drudgery in farm operations, better utilisation of irrigation potential, adoption of multiple cropping pattern, increases production and productivity of farming activities and adds value to the agri-produce through use of machines during post-harvest operations. It also facilitates adoption of innovative and modern agricultural practices, thereby leading to enhanced income. It also creates employment opportunities in rural areas.

There is an urgent need creating scope for farm mechanisation to maintain timeliness of operation such as land levelling, irrigation, sowing and planting, use of fertilizers, plant protection, harvesting and threshing. Such operations need a high degree of precision to increase the efficiency of the inputs and reduce the losses.

Ground Level Credit Flow under Farm Mechanisation during the year 2015-16, 2016-17 and 2017-18 was Rs27539.69, Rs 18659.19 lakh and Rs 20629.89 lakh respectively. The trend of credit flow is uneven.

2.1.3.2 Assessment of Credit Potential for 2018-19

(Rs lakh)

Sr.No.	Activity	Unit (Nos/Ha.)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Tractor (55HP)	No.	7.75	4650	36037.50	27028.15
2	Power Tillers	No.	2.50	3275	8187.50	6140.63
3	Thresher & Agriculture Implements	No.	1.50	8125	12187.50	9140.63
Total						42309.41

The population of people holding more than 4 ha or more land is around 41,000 with a total area of 2.91 lakh ha in the district, forming 28.92% of the total agriculture land with individuals. All these farmers could be considered as potential buyers of tractors and other farm implements. Net sown area in the district is 8.63 lakh ha. and about 31.17% of the net cultivated area is irrigated where intensive use of tractors is possible. Further, assuming that effective life of a tractor as 10 years, about 10% of tractors would require replacement every year. Number of tractors registered with RTO is 59,258. All the above factors will have bearing on the demand for farm equipment in the district.

Keeping in view the above factors and past trends in the ground level credit flow and other related factors, the exploitable potentials for farm Mechanization for the year 2019-20 has been assessed.

2.1.3.2 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- There is urgent need of mechanisation for horticultural crops especially for Grapes. The demand for Sugarcane harvester is the need of the time. Some of the Sugar factories have provided the same to some farmers but the number is negligible (4-5). Farmers of Junnar and Baramatitalukas are among the leading Grapes exporters where size and quality of the fruit matters to meet the international requirement. There is an urgent need to mechanise grape cultivation by introducing machines for its planting, application of biogas slurry, irrigation, spraying and harvesting.
- Around 1,02,000 land holdings of 2-4 ha with a total area of 2.78 lakh ha forming 30.38% of the total agriculture land with individuals who need tractors but are not able to afford. There is an urgent need to educate them about use of farm machinery. Affordable but useful farm implements like small tractors of 15-20 HP are available in the market which will be useful to such small and medium farmers. KVK, Baramati and Gayatri Farmers Club, Malegaon, Baramati took the initiative to introduce the small and medium farmers with such low cost but effective farm implements. The initiative may be replicated in other parts of the district and bankers may be encouraged to finance for such implements.
- Agriculture research universities in Maharashtra have developed various equipment of farm mechanization like, raised bed planter, sugarcane cutter planter, rice planter, sunflower thresher, aero blast sprayer, power weeder, ground nut digger. The field testing, patenting and marketing of the same needs to be addressed.

Action points/issues to be addressed

- Commercial Banks may consider financing of tractors at lower down payments and deposits.
- Banks may consider maintenance and repair expenses of farm assets while sanctioning the KCC limit as per the KCC guidelines. This will help farmers to properly maintain their farm equipment. Establishment of Shade for keeping Farm Equipment's should be considered for finance.
- Banks should devise a suitable policy to provide loans to small farmers for small and effective farm machines. Financial assistance may be provided to Farmers Clubs/ SHGs / JLGs members for establishing service centers for tractors and other farm machines. Custom hiring as an activity can be adopted in the area and financed by the Bank.
- Agriculture Department in collaboration with the manufacturers/dealers should organize demonstration camps and motivate farmers to go in for a higher level of mechanization with a view to increase the production and productivity of agricultural operations thereby resulting in increased incomes.
- Steps should be taken by Extension department to advise farmers about the suitability of various makes, models and horse powers for different size as per their operational holdings. Farmers should be provided training relating to use and maintenance of farm machinery and equipment. Initiative should be taken to educate the farmers, about use of affordable farm machines and adopt new technology to enhance farm production.

Chapter 2.1.4

Plantation and Horticulture including Sericulture

2.1.4.1 Introduction:

Horticulture sector that includes production, postharvest management, processing, marketing and export of wide range of crops such as fruits, vegetables, flowers, spices, plantation crops, medicinal and aromatic plants contributes significantly to the economy of the country as well as State. Growing plantation & horticulture crops is an ideal option to improve livelihood security, enhance employment generation, attain food & nutritional security and increase income through value addition. The sector also provides excellent opportunities to farmers in rainfed areas, where a significant shift towards horticulture is evident. Since the past decade, India has witnessed a huge demand for horticultural produce from domestic market due to increase in per capita income and shift in consumption pattern of the population and international markets as well. This phenomenon has provided a big opportunity to the farmers for fetching higher income through high value horticultural crops.

Agro climatic conditions of the Pune district are conducive for development of various horticulture crops. Some of the major horticultural crops grown in the district are grape, pomegranate, custard apple, fig (Anjeer), mango etc. National Horticulture Mission (NHM) helped in bringing more area under horticultural crops. The district also has a very well developed infrastructure for establishment of fruit processing and food based export oriented units.

Pune district has been identified as an Agri Export Zone (AEZ) for grape and grape wine, floriculture, pomegranates and onion. While Maharashtra Industrial Development Corporation (MIDC) is the Nodal Agency for Grapes and Grape wine and Floriculture. Maharashtra State Agricultural Marketing Board (MSAMB) is the Nodal Agency for Pomegranates and Onion. A Residue Testing Laboratory has also been established at Krishi Bhavan for analysis of chemical residue in grapes before export.

MIDC has established a Floriculture Park at Talegaon, Pune. The Park consists of 102 Growers' Units (with an average land holding of 1.35 ha), 2 Nurseries and 1 post Harvest Technology Centre. MIDC has developed infrastructure facilities in the park. All the plots have been allotted and 75% of the plots have been developed to commercial floriculture units. It is expected that the remaining

projects would be completed in a couple of years. Out of total plots 25% are developed with bank finance. There is ample scope for flow of bank credit for various activities being undertaken in the floriculture Park. Around 3.00 lakh flowers are produced per day which is sold through traders in Mumbai and Hyderabad.

To encourage capital formation in agriculture, thrust is given for term loans. Contract Farming arrangements has already proved successful in Pune district for cultivation of potato and medicinal crops. Government of Maharashtra has amended the APMC Act for Contract Farming arrangements in the state. This change will pave way for introducing Contract Farming in Grapes cultivation for Wineries and Floriculture activities.

Ground Level Credit Flow under Plantation and Horticulture during the year 2015-16, 2016-17 and 2017-18 was Rs13031.11 lakh, Rs8424.05 lakh and Rs 11043.11 lakh respectively. Based on GLC, revised scale of finance, and potential available for Plantation and Horticulture for 2019-20 is projected as follows:

2.1.4.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr. No.	Activity	Unit (No./Ha.)	Unit Cost	Physical Units	TFO	Bank Loan
1	Grape	ha	10.54	2000	21080.00	18972.00
2	Mango	ha	1.45	2700	3915.00	3523.50
3	Pomoegranate	ha	2.05	3450	7072.50	6365.25
4	Custard Apple	ha	1.14	2900	3306.00	2975.40
5	Fig(Anjeer)	ha	1.58	300	474.00	426.60
6	Guava	ha	0.50	650	325.00	292.50
7	Chiku	ha	1.29	1600	2064.00	1857.60
8	Acid Lime	ha	1.67	490	818.30	736.47
9	Floriculture in Poly house (465 sqmt)	No	11.00	970	10670.00	9603.00
10	Vegetables in Shade Net (10R)	No	3.63	2575	9347.25	8412.56
11	Spices and Medicinal & Aromatic Plants	ha	3.00	210	630.00	567.00
12	Sericulture	ha	1.10	193	212.30	191.07
Total						53922.95

2.1.4.3 Availability of infrastructure, critical gaps & interventions required, action points/issues to be addressed

- There are 6 Government and 43 private nurseries in the district which meet requirement of planting material.
- Other inputs like fertilizers, plant protection equipment, pesticides/insecticides, transportation, marketing avenues, processing facilities, training facilities, etc., are also available within the district.
- The National Research Centre for Grape, Directorate of Onion and Garlic Research and Directorate of Floriculture are located in the district and the National Research Centre for Pomegranate is situated in the adjacent district of Solapur. These centers are providing all help and support to the farmers of the district and are also conducting research in various areas pertaining to these crops.
- Maharashtra State Agricultural Marketing Board has established Horticulture Training Center

at Talegaon-Dabhade, for providing training to the farmers in Green House/Poly House management, with special focus on floriculture.

- e. Maharashtra Grape Growers' Association has also established a Training Centre in Pune for providing training to the grape farmers.
- f. Adequate extension services are available through the office of the District Superintendent of Agriculture, as also through the Extension Dept. of Agriculture College at Pune and Krishi Vigyan Kendra (KVK) at Baramati.
- g. The MSAMB with assistance from Agriculture and Processed Food Products Export Development Authority (APEDA), has created an Onion Export Facility Centre at Indapur, Pune having the facilities for standardization, grading and packing, with a capacity of 10 MT/Hour and a storage capacity of 500 MT.

Critical gaps & interventions required

- Crop insurance should cover the period till harvesting and marketing of the crop
- An effective supervision mechanism should be evolved for plantation under Employment Guarantee Scheme to improve survival rates of plants.
- Marketing, storage, processing infrastructure has to be improved for horticulture and vegetables produce in the district.
- Vigorous promotion of use of drip irrigation in horticultural crops by implementing special subsidy programme for horticulture crops is required.
- Active involvement of Growers' Associations in identifying Seri culturists / progressive farmers for horticulture activity in the district may be encouraged.
- Certification facility for organic produce should be available at Taluka level to encourage farmers for adopting the organic farming and facilitating the marketing/ exporting of certified organic produce.
- Some NGOs to be identified specially for training the farmers in quality control, packaging and marketing of vegetables and horticulture produces.

Action points/issues to be addressed

- More and more number of farmers may be brought under the ambit of contract farming with the help of Corporates, especially the ones engaged in food processing and exports. Banks may promote private markets along with existing markets.
- There is a need to develop post harvest infrastructure including setting up of pre-cooling & cold storages, grading & packaging units, marketing/exports, processing, etc., with a view to reducing the post-harvest losses. Hence the need of the hour is to have a coordinated approach in this regard with the active participation of District Agriculture Dept., Banks and NGOs.

Chapter 2.1.5 Forestry & Waste Land Development

2.1.5.1 Introduction:

Forests have a significant role not only in ensuring the environmental stability and ecological balance but also achieving economic benefit. Forests are invaluable natural resources and important eco-systems, which benefit mankind in number of ways. The economic benefits include agroforestry, forest related tourism and revenue earned from trade of forest products such as fuel wood, charcoal, weaving materials, agricultural products and industrial products like gums, resins, oils, and timber. The total geographical area of Pune district is 1562 thousand ha and the total forest cover available is 159 thousand ha which is approximately 10.17% of total geographical area.

The National Forest Policy 1988 recommends coverage of at least 33% of the geographical area under forest & tree cover to maintain the ecological balance of any region.

Forest based activities help in arresting degradation of lands and create employment opportunities in rural areas. Further, it facilitates restoring the ecological balance and increases the production of firewood, fodder, timber and other forest produce. Hence, existing wasteland and some portion of barren and fallow land can be developed for forestry and other plants like Neem and Bamboo. Ambegaon, Junnar, Bhore and Velhe Talukas have good forest cover.

Details of Credit flow during 2015-16, 2016-17 and 2017-18 was Rs 169.42 lakh, Rs 1582.40 lakh and Rs 5170.94 lakh. Based on this, potential for Forestry and Wasteland Development for 2019-20 is projected as under:

2.1.5.2 Assessment of Credit Potential for 2019-20

(Rs lakh)						
Sr.No	Activity	Unit (No./Area)	Unit Cost	Physical Units	TFO	Bank Loan
1	Forestry/ wasteland dev.	ha	0.40	7900	3160.00	2844.00
2	Neem	ha	0.22	4800	1056.00	950.40
3	Bamboo	ha	0.33	6300	2079.00	1871.10
Total						5665.50

2.1.5.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

As per National Remote Sensing Agency (NRSA) data 2005-06, the district has 3.5 lakh ha of wastelands i.e. about 22.52 % of the total geographical area of the district. The cultivable wastelands can be considered as potential area for raising forest tree crops for commercial purposes under the purview of farm/ agro-forestry, if appropriate forward and backward linkages are developed at the ground level. Planting material are available in the district. There are many Government and private Nurseries in the district, which supply seedlings of forest species, viz. teak, Bamboo, Nilgiri, Sisum, Neem etc. The district itself and the adjoining metropolis of Mumbai, offer a readily available market for the forest produce like timber, bamboo etc. Market for neem products is increasing as farmers are using Nimbolipend, neem cake and neem extract as biofertilisers and biopesticides. Apart from the efforts of Forest department and other Govt. Agencies the district also has a very good network of NGOs/VAs, which could be utilized for supplementing efforts of government. Some of these are active in field of afforestation and tree plantations.

Planting materials for growing different species is available in sufficient quantity through nurseries in government and private sector. Similarly, other inputs like fertilizers, pesticides/insecticides, farm equipment, etc. are also easily available in the district.

Under integrated farming programme of the State Govt., farmers are encouraged to cultivate bamboo on their waste lands as well as on the boundaries of their farms. State Govt.'s Eco-Village Scheme under which villages are encouraged for plantation of trees also provides scope for wasteland development.

Action points/issues to be addressed

- There is a need to create awareness regarding techno-economic feasibility of farm forestry with inter-cropping.
- Proper extension support and coordination has to be provided for the exploitation of potential in promoting forestry on private waste land.

- There is absence of marketing tie-up, especially with forest based industries. Initiative should be taken in this regard
- Popularization of Government schemes for increasing plantations.
- Teakwood is the most preferred forest species by the farmers in the region. There is good scope to promote eucalyptus clones for harvesting the essential oil that can be used in the pharmaceutical sector for which there exists a growing demand
- Banks may formulate suitable schemes in consultation with concerned line departments for extending credit for development of forestry and wasteland in the district. Banks may extend credit facilities to SHGs being formed in forest area by State Forest Department.
- There is need for regular interaction among all stakeholders like Banks, Social Forestry Dept., Agriculture Department, NGOs, Farmers, Corporates, etc. and a coordinated approach to ensure that development of this sector is evenly spread.
- There is a need to create awareness among farmers with regard to benefits of taking up plantation of forest and other species on their wastelands. Hence, the Agriculture/Extension Dept. of the state government may emphasis on propagating forest species.
- Present laws on the forestry need to be amended to make them farmers' friendly for encouraging investments in the sector.

Chapter 2.1.6 Animal Husbandry - Dairy

2.1.6.1 Introduction:

Dairy farming is one of the major subsidiary activities in the district providing employment opportunities to the rural poor. The milk production during 2016-17 was 12.77 lakh MT. The per capita availability of milk per day in the district is 369 gms as against the State average of 243 gms per day and recommended intake of 250 -300 gms per day. Of the total milk production, 67.01 % comes from crossbred cows, 4.45% from indigenous/ non-descript cows, 27.47% from buffaloes and 1.06% from goats. As per the latest census the total cattle and buffalo population in the district is 7.63 lakh and 2.94 lakh respectively, of which 5.57 lakh and 2.73 lakh are female population. For bank financing in the district, the breedable female population is important. Although, Dairy Farming is taken up throughout the district, it is taken as prime activity in Haveli, Baramati, Indapur, Daund, Ambegaon, Junnar, Khed and Shirurtalukas. The district offers a very good potential for milk and milk products because of a substantially large urban population and proximity to the metropolis of Mumbai.

Under Animal Husbandry (Dairy) the ground level credit flow during 2015-16, 2016-17 and 2017-18 was Rs 16710.01 lakh, Rs 15054.55 lakh and Rs 19587.09 lakh. Based on this, revised unit cost, potential for Animal Husbandry (Dairy) for 2019-20 is projected as under:

2.1.6.2 Assessment of Credit Potential for 2019-20

(Rs lakh)						
Sr.No.	Activity	Unit (No./Area)	Unit Cost	Physical Units	TFO	Bank Loan
1	Indigenous Cows	No.	0.30	8350	2505.00	2254.50
2	CB Cows	No.	0.55	29850	16417.50	14775.75
3	Buffaloes	No.	0.63	18000	11340.00	10206.00
4	Mini Dairy (5 animals)	No.	3.00	3225	9675.00	8707.50
5	Comm. Dairy (10 CB Cows)	No.	6.00	1750	10500.00	9450.00
6	Comm. Dairy (10 Buffaloes)	No.	7.00	460	3220.00	2898.00
7	Calf Rearing (Heifer)	No.	0.30	2800	840.00	756.00

8	Bulk milk Coolers (3000LPD)	No.	15.50	70	1085.00	976.50
9	Private AI Centres	No.	1.50	44	66.00	59.40
10	Veterinary Clinics	No.	2.60	52	135.20	121.68
Total						50205.33

The demand for milk and milk products is increasing in the district. Though the potential for dairy development is more, the GLC is increasing year by year. Bankers and Animal Husbandry Department are required to address the issues as given under so as to exploit the potential available.

2.1.6.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- The district has 163 milk routes and most of the villages in the district are covered by milk routes of co-operative or private dairies.
- There are 1163 Primary Dairy Co-operative Societies with membership of 68213 dairy farmers. Under Cooperative sector, there are 4 milk processing plants with capacity of 5.50 lakh litres per day. Similarly under private sector there are 41 milk processing plants with capacity of 63.55 lakh litres per day and 57 milk chilling plants with capacity of 27.53 lakh litres per day.
- The Veterinary services in the district are being provided through 6 poly and mini poly clinics, 110 Gr. I Veterinary Dispensaries, 208 Gr II Veterinary Dispensaries, 2 Mobile Vans and 01 Animal Disease Investigation Lab at Pune. There are 271 Artificial Insemination Centers, exclusively under AH Dept., in the district. The Animal Husbandry dept. is planning to set up 100 more AI centers in the district under RKVY. The district also has one State Level vaccine production unit to produce various types of veterinary vaccines/biological.
- **Feed and Fodder:** The total area under permanent pasture and grazing land is 70000 hectare and cultivable waste land is 40000 hectare which can be used for growing fodder for animals. The farmers who own perennially irrigated land and wish to establish dairy units should be encouraged to grow/cultivate green fodder crops at least for their captive use. Fodder cultivation can be taken as commercial individual activity for meeting the demand. Fodder crops like jowar, Maize, Napier grass, Berseem can be raised for fodder purpose. Further, silage can be a option and surplus green fodder can be converted to silage. In addition, the azola, hydroponics technologies are also proving the strength for producing green and nutritious fodder. There is a scope for taking up this activity by SHG members along with mini dairy activity.
- BAIF Development Research Foundation, Pune is also involved in providing AI facilities, fodder development and other dairy related programs. BAIF is also implementing Embryo Technology Transfer Scheme.
- More than three lakh Artificial Inseminations (AI) are carried out every year by the department and the rate of success is 2.5 A.I. Per conception.
- In addition to AH deptt. Milk producers Co-operative and private players in the dairy sector also extend health care and other services to dairy farmers.
- Besides Aarey Dairy and the Pune District Co-op. Milk Union in Government/Co-operative Sector, some big private sector units are playing a major role in the dairy business in the district

2.1.6.4 Action Points/ issues to be addressed

- Special attention is required for revival of closed dairy societies.
- As per National Agriculture Commission norm of one veterinary graduate centre for 5000 adult cattle units, the district requires 235 centres. Similarly it requires 568 AI Centres based on the norm of one centre for 1000 breedable cattle or 1000 breedable buffaloes. Animal husbandry department has to improve veterinary and AI infrastructure.

- There is a need to create awareness among farmers to take up dairy activity on scientific lines and on project basis. Banks should use Area Based Scheme prepared for dairy sector and provided in the document.

Chapter 2.1.7 Animal Husbandry – Poultry

2.1.7.1 Introduction:

Poultry farming can be taken on a commercial basis and also as rural backyard units. They provide supplementary income to the underemployed rural poor besides providing nutritional security. The commercial layer population was 15.22 lakh and broiler population was 152.67 lakh as per 19th Livestock Census 2012. Egg production during the year 2015-16 was about 11180.60 lakh including production from desi birds. The per capita availability is 118 eggs per annum as against the nutritional requirement of 180 eggs per annum.

Pune district being the highest egg producer in the State has emerged as one of the major poultry producing centers in the country due to conducive climate, developed infrastructure and proximity to the metropolis of Mumbai. Some of the big Corporates in the poultry sector in the country, like the Venkateswara Hatcheries, Suguna Poultry, Godrej Agrovet, Baramati Agro, Premium Chick Feeds, Japfa Feed, etc., are operating in the district. Poultry activity is mainly concentrated in Maval and Haveli talukas of the district.

Ground Level Credit Flow under Animal Husbandry (Poultry) during the year 2015-16, 2016-17 and 2017-18 was Rs 9731.67 lakh, Rs 8551.50 lakh and Rs 12184.54 respectively. The trend of credit flow is uneven. Keeping in view the trend in GLC, revised unit cost, potential for Animal Husbandry (Dairy) for 2019-20 is projected as under:

2.1.7.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr.No.	Activity	Unit (No./Ha)	Unit Cost	Physical Units	TFO	Bank Loan
1	Comm. Layers (2000 birds)	No.	11.86	1060	12571.60	11314.44
2	Comm. Broilers (1000 birds)	No.	3.72	1780	6621.60	5959.44
3	Hatchery units	No.	22.00	41	902.00	811.80
4	Broiler dressing Unit	No.	7.26	54	392.04	352.85
6	Egg/Broiler cart	No.	0.30	276	82.80	74.52
7	Feed plant	No.	22.00	20	440.00	396.00
8	Specialized Poultry vehicle	No.	8.25	24	198.00	178.21
Total						19087.26

2.1.7.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- The infrastructure is adequate for the supply of Day Old Chicks (DOCs). The district has a Central Hatchery in government sector at Pune with an annual capacity to produce 3 lakh DOCs of Low Input Technology (LIT) birds of Rhode Island Red (RIR) breed. Similarly, the hatcheries in the private sector like Venkateswara Hatcheries, Poona Pearl Poultry Breeding

Farm, New Maharashtra Hatcheries, Baramati Agro Industries, Sahyadri Hatcheries, Chintamani Hatcheries, etc., have capacity to supply about 2 lakh DOCs per week.

- There are two poultry processing plants in the district with a capacity of about 30000 birds/day.
- Educated unemployed youth may be encouraged to set up small broiler units. Training in scientific management of farm may be arranged for them. Banks may be advised to give priority in extending finance to such new entrepreneurs.
- Poultry feed may be supplied to farmers at subsidised rates for development of this sector.
- The veterinary health care units may be strengthened to meet the requirement of poultry units in the district
- Banks should encourage disbursement of poultry loans for broiler farming through Contract Farming arrangements. Effort should be made to link financing under various Government Sponsored Programs and SHG-Bank Linkage Program with the Contract Farming arrangements in the poultry sector involving the contract farming agencies / integrates
- Graduates in Agriculture and Veterinary Sciences may be encouraged to set up enterprises, especially for providing veterinary and other support services, under the ACABC Scheme.
- The extension machinery of the state government needs to give wide publicity to various incentive schemes of GoI and GoM.
- Animal Husbandry Deptt. is required to be more pro-active in popularizing backyard poultry scheme of GoM and also encourage farmers to rear Low Input Technology (LIT) poultry birds like Vanaraja and Giriraja.

Chapter 2.1.8

Animal Husbandry – Sheep, Goat and Piggery, etc.

2.1.8.1 Introduction:

Sheep & goat rearing activity is generally popular among families living below poverty line and with small/marginal farmers as it serves as source of subsidiary occupation to a large number of rural population. It plays an important role in creating employment opportunities and providing supplementary income to these farmers. The sheep rearing activity is more popular among traditional shepherds in eastern parts of the district, while the goat rearing activity is more or less evenly spread all over the district. Although, a few piggery units have come up in the district, the activity is yet to gain popularity and attain commercial status.

As per 2012 livestock census of Animal Husbandry Department, there are 3.04 lakh sheep, 3.94 lakh goats and 0.095 lakh pigs in the district. The estimated meat production from sheep and goat was about 872 MT during 2015-16.

Potential for financing during the year 2019-20 has been estimated keeping in view the realistic demand for Sheep, Goat and pig meat and other products, availability of infrastructure, predominant role played by the private sector and the past trends in the ground level credit flow.

Ground Level Credit Flow under Animal Husbandry (Sheep, Goat & Piggery) during the year 2015-16, 2016-17 and 2017-18 was Rs 17037.31 lakh, Rs 15158.65 lakh and Rs 19250.72 lakh respectively. Keeping in view the trend in GLC, unit cost, potential for Animal Husbandry – Sheep, Goat Piggery for 2019-20 is projected as under:

2.1.8.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr.No.	Activity	Unit (No./Ha)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Goat Rearing (10 +2)	No.	1.00	10000	10000.00	9000.00
2	Stall fed goatery unit (50 +5)	No.	4.70	2950	13865.00	12478.50

3	Sheep rearing (20+1)	No.	1.50	1960	2940.00	2646.00
4	Small piggery unit (3+1)	No	0.22	290	63.80	57.42
5	Comm. Piggery unit (10+1)	No	0.55	95	52.25	47.03
Total						24228.95

2.1.8.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

Breeding and training Centre -The Sheep and Goat Development Corporation of Maharashtra with its Head Office in Pune is the nodal agency for sheep and goat development. It ensures supply of quality sheep, goats, and also provides training to farmers.

The Rural Agricultural Institute, Narayangaon is also providing training to the farmers on goatery activities. The institute is maintaining a goat farm and is also supplying breeding stock to farmers

Health Care -Livestock health services through veterinary institutions (as indicated in the chapter on Dairy Development) are also available for sheep/goat/piggery activities.

Slaughter house -There are 11 registered slaughter houses in the district.

The district has adequate infrastructure for promoting stall-fed commercial Goat rearing farms and commercial piggery units on a selective basis.

Market - Mumbai and Pune offer a good market for meat and pork products.

2.1.8.4. Action points/issues to be addressed

- Bank may encourage financing eligible activities under Integrated Developments of Small Ruminants
- Financing this activity in groups of SHG/JLG will be beneficial for banks.
- An effective Training and Extension campaign may be launched to create an awareness about benefits of taking up various activities under this sector, especially among the landless and unemployed youth in rural areas.
- Successful farmers should be contacted and be encouraged for availing of bank finance.
- There is a need to promote stall-fed goat rearing as a viable economic activity outside government sponsored programs.
- Similarly, Commercial piggery may also be encouraged, linking it with Hotels/Kitchen Left Overs for optimizing feeding expenses.
- Sheep and Goat Development Corporation may identify proper sources for procuring sheep and goats.
- Animal Husbandry Dept. may identify proper sources for supply of exotic / crossbred pigs and also plan for establishing pig breeding farms.
- Research centre or common service centre on leather processing/ tannery, wool processing units and necessary extension services for training of farmers be established by Sheep and Goat Development Corporation.
- Exposure visits / training of potential SHGs on goat rearing may be considered under ATMA.

Chapter 2.1.9 Fisheries

2.1.9.1 Introduction:

Pune district has enough water bodies for developing inland fisheries as an economic activity. However, it is one of the most underutilized resource in the district. Despite availability of a large number of water bodies in the form of perennial rivers, reservoirs, irrigation tanks, village ponds with

fairly well spread rainfall etc., the flow of credit to this sector is not commensurate with the potential.

The area available for inland fisheries, area brought under fishery and production of fish is as under:

River Length (km)	Area under Ponds, Rservoirsetc.(ha)	Area for Fishery (ha)	Production of Fish (MT)	Fishery Societies
1,252	28,094	22571	26,905	93

Source: District Statistical handbook: 2017

Ground Level Credit Flow under Fisheries during the year 2015-16, 2016-17 and 2017-18 was Rs9970.91 lakh, Rs 5152.91 lakh and Rs1783.36 lakh respectively. The trend of credit flow is decreasing. Potential for financing during the year 2019-20 has been estimated keeping in view the realistic demand, availability of infrastructure and the past trends in the ground level credit flow.

2.1.9.2 Assessment of Credit Potential for 2019-20

(Rs lakh)						
Sr.No	Activity	Unit (No./Ha)	Unit Cost	Physical Units	TFO	Bank Loan
1	Reverine Fishery (Boats & Nets)	Ha.	2.90	350	1015.00	913.50
2	Reservoir Fishery (Boats & Nets)	Ha.	0.40	400	160.00	144.00
3	Pond Fishery	Ha.	2.07	720	1490.40	1341.36
4	Fresh Water Prawn Culture	Ha.	4.50	95	427.50	384.75
Total						2783.61

2.1.9.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

Owing to prolonged submergence of land under water, indiscriminate irrigation practices, vast areas of land have turned saline and making it unfit for crop cultivation. It has been proved that Fresh Water Prawn Farming in these affected areas not only produces good quality prawn suitable for export but also reclaim the land for cultivation over four to five years period. The district has about 5000 ha. of saline affected soils, especially in sugarcane growing belt, which offers scope for fresh water prawn culture, apart from tanks and ponds.

Availability of Infrastructure

Fish Farmers' Development Agency (FFDA) in the district is making efforts to bring village ponds/tanks and small irrigation tanks under fish culture.

Equipment and inputs machinery required for inland fisheries activity, like boats, nets, fertilizers, fish seed, etc., are easily available in the district.

The Fisheries Department provides fish seed (fingerlings) to farmers through its hatchery at Hadapsar, Pune. Similarly, Fisheries Department and FFDA also provide technical and other extension services, subsidy on capital cost, input cost for fish culture, hatching etc. to fish farmers and also help in the marketing of fish catch. As on 31 March 2018 there were 93 fishermen societies in the district.

The State Government has policy to lease tanks, owned by the Irrigation Department, Zilla Panchayat, Gram Panchayat, for fisheries development. Tanks with watershed area upto 200 ha. are being leased to Fishermen Cooperative Societies.

The infrastructure such as cold storages, markets, insulated/ refrigerated vans for fish and fish products is inadequate in comparison to other perishable food products. Sahyadris and its branches offer lot of opportunity for damming the streams leading to large number of lakes in Pune district.

Critical gaps & interventions required

- Integrated reservoir development plan for increasing fish production both under capture and culture fisheries is required. Establishment of aqua mart & aqua labs.
- Efforts for development of saline lands and utilize the same for aquaculture.
- Fish seed rearing in private sector needs to be promoted.
- Ornamental fish parks may be set up.
- Setting up hygienic fish markets utility for which assistance available from NFDB .
- Increase in fish seed production, utilize available inland fisheries potential with optimum fish seed stocking and reservoir fisheries development with the help of NFDB to achieve higher fish production are the priority areas to achieve expected growth rate in inland sector. The training and awareness creation of fishers and aqua-culturists about resource potential, business management, responsible fishing, laws and regulations, incentives etc, needs priority attention.

Action points/issues to be addressed

- Banks may coordinate with FFDA for identification of borrowers, form SHGs / JLGs group of farmers so that financing and recovery is facilitated.
- Revitalization of defunct fisheries cooperative societies.
- The lease period of ponds and tanks owned by Gram Panchayat, ZP, Municipalities and Irrigation Department need to be enhanced to 7 to 10 years so as to facilitate banks to extend long term loans for improving production and productivity.
- There is need to encourage rearing of carp spawn to fingerlings and yearling by the entrepreneurs including allotment of suitable lands so that the carp seed production and rearing can be developed with bank credit.
- State Government may consider availing loans under Rural Infrastructure Development Fund (RIDF) from NABARD for creation of common infrastructure.
- Identification of reservoir fisheries for scientific stock management and development.
- Encouraging fishermen to undertake fresh water prawn farming in order to increase fish production
- Strengthening of inland fish marketing by providing infrastructure facilities
- Encourage private farmers for construction of new fish ponds for providing employment and providing self employment to them
- Renovation, expansion and upgradation of the existing fish seed production farms.
- Ornamental fish farming through groups especially women SHGs

Chapter 2.1.10

Farm Credit Others - Bullocks, Carts, two wheelers etc.

2.1.10.1 Introduction:

Due to small size of land holding and suitability of bullocks for ploughing and other agricultural operations, many farmers still follow the traditional method of agriculture using bullocks for ploughing and other agricultural operations. Bullock carts are still used for transportation of agricultural produce. Even today bullocks continue to be source of power for agricultural operations for large number of farmers with small unirrigated land holdings, as mechanisation is not viable option for them. Major source of power for agricultural operations in rural India is bullocks. The large number of sugar factories in the district also offer potential for financing bullocks & bullock carts for transporting sugarcane from field to the factory. Both the bullocks and bullock carts are

locally available, easily maintainable, have multiple uses and adaptable for a variety of conditions. Bullock carts are also used for custom hiring which is a source of income to the farmers / agricultural labourers. Further, activity like farm house can also be source of income to farmers considering emphasis given on rural tourism and also can be utilized for stay purpose of farmers and agricultural labourers.

Ground Level Credit data for the activities are clubbed with other activities and indicated in Annexure III.

2.1.10.2 Assessment of Credit Potential for the year 2019-20

(Rs lakh)

Sr.No.	Activity	Unit(No./Ha)	Unit Cost	Physical Units	TFO	Bank Loan
1	Bullocks/other animals	No.	0.35	5200	1820.00	1638.00
2	Bullock Carts	No.	0.33	3450	1138.50	1024.65
Total						2662.65

Keeping in view the increasing use of mechanisation in agricultural operations, improved transportation systems and communication facilities and the past trend in the flow of bank credit to this sector, potential for financing of bullocks/bullock carts for the year 2017-18 has been assessed.

2.1.10.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- The health care facilities for the bullocks are available through a network of veterinary centers and dispensaries as indicated in the chapter on Animal Husbandry – Dairy Development.
- By and large, good number of quality bullocks, cart manufacturing and repairing facilities are available in the district.

Suggested Action Points:

- AH Dept. may formulate special breeding programme for improving quality of the bullocks.
- Banks may finance as per market cost of carts and encourage use of pneumatic tyre carts for transport purpose.

Chapter 2.2

Agriculture Infrastructure

Agriculture Infrastructure is the most essential input regarding the development of Indian agriculture as one third population of the country depends on agriculture sector directly or indirectly. At present, much emphasis has been on commercializing agricultural production, hence adequate production and distribution of food has become a high priority. This in turn implies that agriculture infrastructure like seeds, fertilizers, irrigation sources should be organized to achieve the maximum momentum of growth.

The factors like high soil productivity, supply of balanced crop nutrients, efficient water management, improved crops, better plant protection, and post-production management for value-addition are responsible for higher yield in the Indian agriculture. Further the uninterrupted supply during off season requires creation of scientific storage and market facility including warehouses, market yards, godowns, silos, cold storage units and cold storage chains.

2.2.1 Construction of storage and Marketing Infrastructure (warehouses/godowns, market yards, silos, cold storage units/ cold chains)

2.2.1.1 Introduction:

The Maharashtra State Warehousing Corporation (MSWC) owned by the Government of Maharashtra and Central Warehousing Corporation has created storage infrastructure in the State with around 193 centers with a total capacity of 15.73 Lakhs M.Ts. (as on 31st March 2016). MSWC has introduced measures for providing economical services to the farmers to store their primary produce and encourages farmers to avail the facilities of scientific storage by giving rebate up to 50% to them. Besides this, rebate up to 50% is also given to the farmers from SC/ST categories and notified tribal areas. Warehousing activities of MSWC include scientific storage of food grains, fertilizers, industrial goods, cotton bales, cement, and at some places it runs custom bonded warehouses and container freight stations.

Pune district produces large quantity of food grains, pulses, fruits and vegetables. However, there is a growing concern about level of loss of agriculture produce due to the non-availability of proper post-harvest facilities, especially the scientific storage facilities. In some of the commodities this wastage is as high as 40 per cent. Adequate and proper storage facilities not only increase the shelf life of agricultural commodities but also help the farmers in realizing remunerative prices and avoid/discourage distress sales.

Agriculture is the main occupation of the people of this district. The main crops grown are paddy, jowar, wheat, bajra, cereals, groundnut and sugarcane.

Ground Level Credit Flow under Construction of Storage Facilities during the year 2015-16, 2016-17 and 2017-18 was Rs 6280.06 lakh, Rs 6418.16 lakh and Rs 7847.55 lakh respectively. The trend of credit flow is increasing.

2.2.1.2 Assessment of Credit Potential for 2019-20

Considering the importance of storage facility and the storage capacity already created in the district a realistic view was taken while assessing projection. The uneven distribution of rural godowns and its concentration in few blocks such as Haveli, Baramati, Shirur, etc., leaves scope for development of the same in other blocks. The adverse impact of lack of infrastructure facility is more pronounced in the case of the small and marginal farmers who constitute major part of entire farming community.

(Rs lakh)

Sr.No.	Activity	Unit (No./MT)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Storage Godown (500 MT)	No	27.50	640	17600.00	13200.01
2	Onion storage structure (25 MT)	No	0.62	1280	793.60	595.20
3	Market Yards	No	40.00	61	2440.00	1830.00
4	Infrastructure for Marketing, Grading & Standardisation	No	22.00	150	3300.00	2475.00
5	Cold storage units (100 MT)	No	15.00	169	2535.00	1901.25
Total						20001.46

2.2.1.2 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- In Pune district, there are 12 main market yards of APMCs / controlled market yards located at Baramati, Bhore, Daund, Indapur, Junnar, Khed, Manchar, Nira, Pune, Shirur, Talegaon, and Mulshi. Under these main market yards, there are 39 sub-market yards operating under the control of Agriculture Produce Marketing Committees. These market yards provide place for free and fair trading, grading & weighing facilities and also help farmers to market their commodities.
- Maharashtra State Warehousing Corporation (MSWC)- they have 9 warehousing centers in Pune district- their capacity details are available on the mswc website, in their annual report. A silo of 50000MT under PPP mode is also proposed by MSWC at Baramati
- Besides, a number of private godowns and cold storages have also been set up by the private entrepreneurs thereby creating additional storage facilities.
- Maharashtra State Agricultural Marketing Board has set up an Onion Storage Facility at Indapur. This unit also offers facilities for grading and packaging of onions for export purposes.
- Timely availability of market information is a critical factor for enabling the farmers to realize a certain and best price for their produce.

Action points/issues to be addressed

- Block/ Taluka wise scientific assessment of storage capacities required in the district for creation of additional storage capacity.
- Agricultural extension services may propagate the importance of scientific postharvest techniques including use of storage facilities. Strengthen marketing infrastructure and facilities in regulated markets.
- APMCs should provide facilities for processing and packing of agricultural produce.
- Awareness among farmers about government Schemes for storage facilities has to be created.
- Encourage pledge finance. Encourage farmers and entrepreneurs to take advantage of subsidy available under the schemes
- There is a need to improve the power supply position to ensure viability of cold storage units.

Chapter 2.2.2

Land Development, Soil Conservation & Watershed Development

2.2.2.1 Introduction:

Land Development (LD) activities are of critical importance for ensuring effective utilization of land and water resources, more so when about more than 70% of the gross cropped area is rain fed as in the Pune district. Agriculture depends upon the fertility of the soil and adequate moisture to support

plant growth. Thus soil and water are the two basic natural resources needed for farming. Land Development encompasses activities relevant to soil conservation, water management, land reclamation, on farm development, etc. In view of the emerging need to ensure food security, sustainability of enhanced productivity has assumed importance. There has been a perceptible improvement in level of awareness among farmers about benefits of land development relating to these activities.

Keeping in view problems of erosion of top soil as also the scarcity of water resources, watershed development will be the proper solution for water problem in the district. At present, watershed development activities are being undertaken by the State Government and NGOs, under programs like the Integrated Watershed Development Program Vasundhara), JalyuktShivarAbhiyan, Adarsh Gram Yojana etc. Activities under these programmes are by and large limited to contour bunding, generally on public lands and to a very limited extent on private land with bank loan.

Banks have to play a proactive role to exploit the potential created for deployment of credit for on-farm development and other activities in treated watersheds. Watershed-wise Banking Plans would be required to be prepared for Farm as well as Non-Farm activities, for the purpose of providing credit to the farmers, who require additional funds due to the improved moisture regime, availability of water, fodder, etc.

The trend of credit flow is uneven. Details of Credit flow during 2015-16, 2016-17 and 2017-18 was Rs 14642.71 lakh, Rs 17116.39 lakh and Rs 10373.60 lakh respectively.

2.2.2.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr.No	Activity	Unit (No/Ha)	Unit Cost	Physical unit	TFO	Bank Loan
1	Land Leveling	Ha	0.22	16200	3564.00	3207.60
2	Land Reclamation (saline)	Ha	0.33	5900	1947.00	1752.30
3	Organic Farming	Ha	0.275	6950	1911.25	1720.15
4	Farm Pond (50x50x7.50mt)	Ha	1.51	4730	7142.30	6428.09
5	Soil/Water Conservation	Ha	0.12	3350	402.00	361.80
6	Poly Mulching	Ha	0.08	6030	482.40	434.16
7	OFD	Ha	0.10	5450	545.00	490.50
Total						14394.60

2.2.2.2 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

The district has more than 80% of farmers having land holding of 2ha or less than 2 ha; In this situation they cannot afford machineries for land leveling. There for collective ownership of machineries by Farmers' Clubs, Farmers' Groups may be encouraged.

Farm Pond: Harvesting and recycling of rainwater in farm pond for critical lifesaving irrigation in Kharif and pre-sowing irrigation to short duration rabi crop is gaining popularity. Due to lack of irrigation facilities the area having scanty rain fall are forced to adopt mono cropping pattern. The farm ponds are very useful in the area. But due to small land holding farmers are not willing to spare land for farm ponds. Government of Maharashtra has introduced the scheme of Farm pond for whosoever demands it. It is necessary to increase awareness among the farmers and demonstrate some good models for alternate land use.

Marketing Facility- There is an urgent need for arrangement of marketing facilities for organic farming products, so as to motivate more number of farmers for adoption of organic farming. Certifying laboratories for the benefit of organic farmers should be established at taluka level. There

are many villages where farmers are producing vegetables without the use of chemical fertilizers and pesticides. Department of Agriculture may establish more laboratories for soil testing. The facility should be extended upto taluka at a minimum cost.

Suggested Action Points

- Banks and development agencies should identify agriculture graduates willing to establish Agri-Clinics / Agri-Business Centers, and extend necessary financial support for supplementing the existing extension network.
- There is need to promote and finance schemes of NADEP Compost, Vermi Compost, Bio-Fertilisers, Bio-Pesticides, Organic Farming, etc. Both, the banks and the government departments, can play an active role in this direction.
- The financing of model scheme of NABARD and National Horticulture Mission may be popularized in the district.
- Mobile Soil Testing and Testing Laboratory for organic farming should provide door to door service to encourage farmers of remote areas and away from taluak / district places.
- Irrigation Department should assess the requirement of On-Farm Development Part-II works in the command area of Irrigation Projects.
- Demonstration plots may be set up for exhibiting effective reclamation of saline lands.
- Extension machinery of the State Government/District Administration should embark upon a campaign to create more and more awareness among the farmers about the tangible and intangible benefits of undertaking LD activities.
- Banks should also play a proactive role in extending credit for LD activities especially in completed watersheds and CADA. The village watershed committee of completed watersheds may form farmers club which can be trained for preparing area development scheme for the watershed village. These clubs may also be graduated into a business correspondent.
- Awareness of effective utilization of "Plasticulture in agriculture", like plastic mulching, drip irrigation, shade net, plastic lining of farm ponds, etc.
- Special Bank Plans may be prepared for completed watersheds and community may be supported with bank credit.
- Awareness on Integrated Nutrient Management & Integrated Pest Management may be mooted to reduce the dependence on chemical agriculture.
- Programme for popularization of Micro Irrigation Systems may be undertaken for small & marginal farmers, JLGs, Women farmers, SHGs, etc.
- Solar Water Pumping associated with Drip Irrigation cluster may be promoted with credit support especially for small farmers.

Chapter 2.2.3

Agriculture Infrastructure-Others

2.2.3.1 Introduction

Productivity in agriculture depends on the quality of seed, suitable fertilizer and the practices adopted for cultivation. The performance and efficiency of other inputs depends on the quality of seed. Certified/quality seed plays an important role in achieving higher yields. Hence supply of quality seed to the farmers is one of the most important interventions to increase the production and productivity of any crop. Sustained increase in agriculture production and productivity

necessarily requires continuous development of new and improved varieties of crops and efficient systems of production (Seed Chain) and supply of Certified/Quality seed to farmers.

2.2.3.2 Assessment of Credit Potential for 2019-20

Taking into account, the present status, various infrastructure availability/gaps and recent policy and promotional interventions, estimates for 2019-20 are as follows:

(Rs lakh)

Sr.No.	Activity	Unit(No./Area)	Unit Cost	Physical Units	TFO	Bank Loan
1	Tissue Culture lab	No.	60.00	23	1380.00	1242.00
2	Seed Production Unit	No	0.55	503	276.65	249.02
3	Bio Fertiliser	No.	28.00	12	336.00	302.40
4	Vermicompost Unit	No.	0.40	730	292.00	262.80
					Total	2056.22

2.2.3.3 Availability of infrastructure, critical gaps and interventions required, action points/issues to be addressed

a. Infrastructure, critical gaps

- Supply of quality seeds in required quantity and appropriate time to farmers is a critical issue which is to be addressed.
- Agriculture and Horticulture Departments are promoting vermi-compost by providing subsidy and also propagating extensive use of bio-fertilizer to increase their efficiency and to reduce the use of chemical fertilizers.
- The district has officials from Agri department, KVK, and a few NGOs who conduct various awareness/capacity building programmes on an ongoing basis with regard to steps required for conservation of fertility of land.

b. Critical interventions & action points

- A few quality seed processing plants in a few select villages would help the seed processing.
- There is a need to create awareness on use of bio-fertilizers at mandal and village levels by utilizing the services of village/community organisations like FCs / NGOs.
- Efforts may be made to involve Private Sector/NGOs for setting up manufacturing facilities for Vermicompost, Bio Fertiliser and Fruits & Vegetable Compost.

c. Suggested Action Points

- Banks to encourage Farmers' Clubs/PACS/SHGs to take up production of quality compost/ vermicomposting, organic seeds/ planting materials and plant protection materials.
- Farmer's Cooperatives, exclusively for promotion of organic farming which can also act as business platform for the farmers, may be promoted.
- Bankers may extend credit to seed processing, vermicomposting units and bio-fertilizer units

Chapter 2.3 Agriculture - Ancillary Activities

2.3.1 Food and Agro Processing

2.3.1.1 Introduction:

Agro and food processing sector is of great importance for Indian agriculture on account of its potential contribution in the reduction in post-harvest losses, better price realization, catering to the changing domestic demand for processed agro-products, enhancing the competition of Indian agriculture to meet the challenge posed by changing global agricultural. It ensures linkages and synergies between industry, agriculture, post-harvest technology and management. It plays a crucial role in value addition to agricultural produce. Farmers can get good price for their produce. This also ensures creation of additional employment opportunities in rural area.

As per the revised priority sector guidelines of RBI (circular dated 23rd April 2015), loans for food and agro processing up to an aggregate sanctioned limit of Rs 100 crore per borrower from banking system shall be classified under agriculture-ancillary activities.

Scope of processing activities

The district is surrounded by some of the most fertile regions of the state which also produces some other varieties of cereals, pulses, vegetables and fruits in large quantities. All these factors make Pune district an ideal destination for the establishment of agro& food processing industries. Besides, a high level of urbanization within the district, as also the proximity to the metropolis of Mumbai/Thane, an assured market is readily available. There is increasing demand for agro processing infrastructure in view of growing awareness among farmers and shift in cultivation in many blocks of the district. The National Research Centre for Grapes under ICAR is situated at Manjari, Pune and is working on safe grape production and productivity and transfer of technology and capacity building of stakeholders. To harness the emerging opportunities in floriculture a strong institutional support is inevitable, which shall address the genetic resource utilization, development of cultivars, production technology, productive use of water, plant architecture engineering and management, protection technology, value addition, database and human resource development. To address these multifaceted research issues the Indian Council of Agricultural Research has established a dedicated Directorate of Floricultural Research (DFR) at College of Agriculture Campus, Pune. There are two KVKs in Pune district i.e at Baramati and Narayangaon which aims at reduction of the time lag between generation of technology at the research institutions and it's transfer to the farmer's field for increasing production, productivity and income from the agriculture and allied sectors on a sustained basis.

Block-wise potential for food and agro processing and activities is as under:

2.3.1.2 Assessment of Credit Potential for 2019-20

Keeping in view the increasing demand and the past trend in the flow of bank credit to this sector, potential for the year 2019-20 has been assessed.

(Rs lakh)

Sr.No.	Activity	Unit(No./Ha)	Unit Cost	Physical Units	TFO	Bank Loan
1	Rice Mills	No.	28.60	166	4747.60	3560.70
2	Rice Poha Mills	No.	28.60	86	2459.60	1844.70
3	Dal Mills	No.	28.60	80	2288.00	1716.00
4	Oil Mills	No.	33.00	102	3366.00	2524.50
5	Bakery Units	No.	3.85	365	1405.25	1053.97

6	Papad/ Pickle Units	No.	3.30	260	858.00	643.52
7	Chikki Units	No.	5.50	169	929.50	697.16
8	Fruit / Pulp Processing	No.	5.50	184	1012.00	759.02
9	Meat Processing (medium)	No.	346.50	13	4504.50	3378.41
10	Spices	No.	2.20	160	352.00	264.00
	Total Bank Loan					16441.98
	Total Working Capital					8220.99
	Grand Total					24662.97

2.3.1.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- In the dairy cooperative sector, there are 4 milk processing plants with capacity of 5.50 lakh litres per day. Similarly under private sector there are 41 milk processing plants with capacity of 63.55 lakh litres per day and 57 milk chilling plants with capacity of 27.53 lakh litres per day.
- As regards poultry, there are 04 hatcheries having a stock of about 1.0 lakh parent layer birds and 12 broiler hatcheries with a stock of 4.40 lakh parents. There are two poultry processing plants with a capacity of 30000 birds/day. There are 04 feed mixing plants in the district. Besides, branded poultry feed.
- Both Central and State Government are committed to the development of this sector. Agencies like Maharashtra Agro Industries Development Corporation (MAIDC), District Industries Centre (DIC), Small Farmers' Agribusiness Consortium (SFAC) Agriculture Department of the State Government, etc., are playing a key role in the development of this sector.
- The district is having presence of some of reputed companies in the field of agro-processing like Alfa Laval, Praj Industries, S S Engineers, Tetra Pak, Nichrome, Gits Foods, Cargill Foods, PravinMasalewale, Chordia Foods, Dohler India, Weikfield, Dynamix Dairy, Frito Lays, etc.(Source: NIAM Report 2011)
- Open up multi brand retail to bring in more global investments in the infrastructure and logistics domain; and in turn contribute to the growth of supply chain & logistics sector in particular and economy in general.
- Backward linkages between farmers and industry should be promoted in order to encourage and facilities farmers to produce good quality products. This will help the farmers to get the appropriate price for their produce. Institutions such as local bodies and cooperatives should play an active role in strengthening such backward linkages as they act as an essential links between the farmers and the processors. This can be achieved by ensuring smooth flow of raw materials from the farmers to the processors and fixing the right prices for the farmers.
- Develop forward linkages for fresh and processed food by elimination of intermediaries from the chain of operations so that all the activities, such as transportation and market distribution, go on smoothly resulting in low cost to the processors and high return to the farmers.
- Farmers and other cooperatives should be provided extensive training in pre and post-harvest management of agro produce and should be educated on the advantages of setting up preprocessing facilities in vicinity to the farms. These facilities may include provision for washing, fumigation, packaging, etc.
- Efforts could also be made to set up agro processing units close to the area of production to avoid wastages in transit. An efficient marketing system should be developed to tap the huge market for processed food. This would ensure reduction in post-harvest losses, promote graded processing, packaging services, and food safety practices, induce demand driven production and facilities exports.

Suggested Action Points:

A. Banks:

- Banks have to relax the norms for calculation of requirement of Working Capital. Further, the entrepreneurs have to bear heavy interest cost for stock holding and banks/Govt. may have to look into this issue for ensuring the viability of these units.
- Provide loans to unemployed youth trained by MCED/MITCON for agro and fruit processing
- Encourage SHGs to undertake Papad making activity of Nachni/rice on commercial basis.
- Encourage poultry farmers for meat-processing/egg and fish processing activity.

B Govt. Dept:

- DIC may look into under noted constraints which are hampering growth of these units: Inadequate knowledge on preservation techniques, product diversification, inferior/higher cost of packaging, poor hygiene practices, labelling norms, absence of linkage with markets other than Mumbai. A/H Dept. /DIC may encourage entrepreneurs to start meat/fish/egg processing/oil mills, etc.
- Agri. Dept. may train Women SHGs and farmers growing various fruits for starting canning, pulp, jam, pickles, juice etc. having small processing capacities between 5 to 50 MTs.
- Facilitate promotion and handholding of Farmer producer organisations, who can act as a link between the farmer members and food processing units.

Chapter 2.3.2 AgriAncilliary Activities - Others

2.3.2.1 Introduction

RBI has vide its circular No. RBI/2014-15/573/FIDD.CO.Plan.BC.54/ 04.09.01/2014-15 dated April 23, 2015 on targets and classification of priority sector put the following as qualifying for priority sector.

- i. Loans up to Rs5 crore to co-operative societies of farmers for disposing of the produce of members.
- ii. Loans for setting up of Agri. Clinic and Agribusiness Centers.
- iii. Loans for Food and Agro-processing up to an aggregate sanctioned limit of Rs 100 crore per borrower from the banking system.
- iv. Bank loans to Primary Agricultural Credit Societies (PACS), Farmers' Service Societies (FSS) and Large-sized Adivasi Multi-Purpose Societies (LAMPS) for on-lending to agriculture.
- v. Loans sanctioned by banks to MFIs for on-lending to agriculture sector as per the conditions specified in paragraph IX of this circular
- vi. Outstanding deposits under RIDF and other eligible funds with NABARD on account of priority sector shortfall.

2.3.2.2 Assessment of Credit Potential for 2019-20

The details of activity wise projection are furnished below:

(Rs lakh)						
Sr.No.	Activity	Unit(No./Ha)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Loans to PACS	No.	11.00	72	792.00	712.80
2	Loans to MFIs	No.	11.00	24	264.00	237.60
3	Agri. Clinics/ Agri. Business	No.	11.00	110	1210.00	1089.00
Total						2039.40

2.3.2.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- Pune district has a network of 1282 Primary Agriculture Cooperative Societies (PACS). Many PACS are functioning as multi service societies.
- MITCON and KVKs are providing training facilities. Good number of Agri Graduates are taking part in these programmes.

Action points/issues to be addressed

- Banks can finance for eligible trained graduates in coordination with training centers and line departments considering gap in number of success stories and units financed by banks.
- Banks may also encourage units involving graduates relating to allied sectors like veterinary science, fisheries, agriculture engineering, etc.
- The controlling offices of banks may consider sensitising branch managers about the scheme and allocate suitable targets for financing ACABC units for identified branches.
- The Agri Clinic Agri Business Scheme in operation since modified by Govt of India and the State Governments, Krishi Vigyan Kendra, Banks and Panchromatic Raj Institutions shall also be henceforth actively involved in its implementation.
- Banks may explore the opportunity of financing viable cooperatives and MFIs as the new business opportunity.

CHAPTER 3

Credit Potential for Micro, Small and Medium Enterprises (MSME)

3.1 Majority of people living in rural areas draw their livelihood from agriculture and allied sectors. However, the growth of other sectors such as manufacturing and services is also necessary to sustain the balanced development of the economy. Development of MSME helps in capital formation, growth of entrepreneurship among local people, reduced migration and ensures inclusive growth.

Bank loans to micro, small and medium enterprises in both manufacturing and service are eligible to be classified under priority sector. The limits for investment in plant and machinery/equipment for manufacturing / service enterprise, as notified by Ministry of MSME, vide, S.O.1642(E) dated September 9, 2006 are as under:-

Sector	Manufacturing Sector - investment in plant & machinery	Service Sector- Investment in equipment
Micro	< Rs 25 lakhs	<Rs10 lakhs
Small	Rs 25 lakhs – Rs 5 crores	Rs 10 lakhs – Rs 2 crores
Medium	Rs 5 crores- Rs 10 crores	Rs 2 Crores - Rs 5 crores

As per the revised Priority Sector Lending guidelines by the RBI, all the loans to MSME would be classified as priority sector lending by banks. All the loans to units in the Khadi and Village Industries sector are classified under the sub-target of 7.5% prescribed for the micro enterprises. Loans to entities involved in assisting the decentralized sector, in the supply of inputs to and marketing of outputs of artisans, village and cottage industries form part of MSME. The priority sector guidelines also state that in order to ensure that the MSMEs do not remain Small or Medium units merely to claim eligibility for priority sector status, the MSME units will continue to enjoy the priority sector lending status upto three years, even after they grow out of the MSME category concerned.

Removal of Cap of loan limits per borrower to MSME-Services Sector- With the increasing prominence of services sector in the economy, RBI has issued guidelines in respect of removal of the loan limits of Rs.5 crore and Rs. 10 crore per borrower to Micro/ Small and Medium Enterprises (Services) respectively, to Scheduled Commercial Banks for classification under priority sector. Accordingly, all bank loans to MSMEs, engaged in providing or rendering of services as defined in terms of investment in equipment under MSMED Act, 2006, shall qualify under priority sector without any credit cap. (Ref- RBI/ 2017.18/ 135 FIDD.CO.Plan.BC.18/ 04.09.01/2017.18 dated 1 March 2018) (Due to the above changes, the SLBC has substantially enhanced the MSME targets under the ACP for 2018.19 for the state as a whole.)

Regarding the Relief for MSME Borrowers registered under Goods and Services Tax (GST), the RBI Cir No. RBI/2017-18/129 DBR .No.BP.BC.100/21.04.048/2017-18 may please be seen.
RBI has reiterated the instructions in its Master circular on LBS dated 2.7.2018

Government of India has announced major schemes like Start up India, MUDRA, Stand up India, Make in India and Skill India to develop much required entrepreneurship in the country

The aspects such as the significance of the MSME sector, the perspectives- directives- initiatives of GoI- RBI- NABARD , the major GoI schemes like Start up India, MUDRA, Stand up India, Make in India and Skill India to enhance entrepreneurship, the support available from NABARD, the State Scenario, the GLC Flow in the state showing the extent of disbursement under MSME sector vis-à-vis other priority sectors, the ACP targets and achievements related to the sector, major activities

under the sector financed in the state, a gist of the Industrial/ MSME/ Innovative Start Up policies of the State Government, District-wise Clusters with potential for MSME which entail bank finance, the new ideas being contemplated etc have been presented in the NABARD website- <https://www.nabard.org/plp-guide.aspx?id=698&cid=698>

3.2 District Specific:

Pune is a highly industrialized district and has a vibrant industrial environment. A variety of activities connected with manufacturing, processing and servicing exist in large, medium, small and tiny/cottage industries sector promoted by individuals, cooperatives as well as large corporates in private and public sector. The industrial development in the district is being ensured by the Industries Dept., GoM, District Industries Centre (DIC) and Maharashtra Industrial Development Corporation (MIDC). MIDC is involved in creating requisite infrastructure for facilitating industrial development.

There are 14 industrial estates in the district of which 8 industrial estates have been developed by MIDC, 6 by industrial cooperatives and 10 industrial estates by private sector in and around Pune city.

3.3 Assessment of potential for the year 2019-20

Term Loan: Based on infrastructure facilities presently available/planned and past trend in flow of ground level credit, estimates of potential for term loan is suggested for 2019-20 as indicated below.

Working Capital: As per Nayak Committee Report, working capital limits to SSI units is computed on the basis of minimum 20% of their estimated turnover up to credit limit of Rs 5 crore. Keeping in view launching of LaghuUdhyami/Swarojgar/Artisan Credit Cards etc. and need to enhance growth rate for 20% by banks, estimation of potential for working capital is suggested as indicated in table.

Ground Level Credit Flow data under Non-Farm Activities for last 3 years i.e. during 2015-16, 2016-17 and 2017-18 was Rs577451.01 lakh, Rs 885100.00lakh and Rs 689652.72 lakh respectively. However, detailed activity-wise data is not available. Keeping in view the growing industrial activities in the district, credit limits sanctioned by bank branches and RBI policy following assessment of potential for term loan and working capital for new and existing units under MSME sector has been assessed for the year 2019-20.

Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr No	Activity	Unit Cost	Physical Units	Total Financial Outlay	Bank Loan
A	Term Loans				
(a)	Manufacturing sector enterprises				
1	Micro Enterprises	20.00	9600	192000.00	153600.00
2	Small enterprises	50.00	5350	267500.00	214000.00
3	Medium enterprises	600.00	865	519000.00	415200.00
	Sub Total				782800.00
(b)	Service sector enterprises				
1	Micro enterprises	10.00	6700	67000.00	53600.00
2	Small enterprises	50.00	3400	170000.00	136000.00
3	Medium enterprises	200.00	1175	235000.00	188000.00
	Sub Total				377600.00
	Term loan- total				1160400.00
B	*Working Capital (@ 25 % of term				

	loans)				
(a)	Manufacturing sector enterprises				
1	Micro Enterprises			48000.00	38400.00
2	Small enterprises			66875.00	53500.00
3	Medium enterprises			129750.00	103800.00
	Sub Total				195700.00
(b)	Service sector enterprises				
1	Micro enterprises			13400.00	10720.00
2	Small enterprises			42500.00	34000.00
3	Medium enterprises			58750.00	47000.00
	Sub Total				91720.00
	Working Capital- total				287420.00
	MSME Grand total				1447820.00

3.4 Critical Interventions and Suggested Action Points:

- Motivation of entrepreneurs and availability of expertise / technical manpower in banks may synergetically result in better outcome.
- Common Facility Centres may be established and job oriented training programmes for skill development need to be conducted.
- Awareness may be created by various agencies amongst the entrepreneurs about the opportunities in the MSME sector and about the government incentives for promoting this activity.
- Banks to consider the credit requirement of traditional sub-sectors of handlooms, handicrafts, village artisans, KVI units to protect the livelihood of the sector and their employment generation potential.
- Working capital is critical for the small enterprises. Assessment of working capital requires data on production capacity, annual turn-over, operating expenditure, production cycle, etc. Banks may extend adequate working capital for the small scale enterprises. Adequate and timely availability of working capital is the most important factor for successful working of any enterprise.
- Banks may set up exclusive offices for appraisal and sanction of projects under micro and small industries sector in the district.
- An Integrated infrastructure package for rural tourism with all the necessary components such as travel, transport, lodging, boarding, communication, power supply, advertisement, security, sight- specific characteristic facilities for exploration/ trek/ adventure/ sports etc would impart a thrust to service sector
- Private participation in creating infrastructure facilities may enhance opportunities in manufacturing sector
- Banks / Govt Deptts may provide information to the customers about various schemes / facilities provided under service sector
- For facilitating the Stand up India scheme, an interactive portal www.standupmitra.in has been developed through which borrowers can submit applications .The concerned banks and agencies should offer the necessary support to the prospective entrepreneurs and sanction the cases.

Chapter 4

Credit Potential for Export Credit, Education and Housing

4.1 Export Credit

4.1.1 The new Foreign Trade Policy for 2015-2020 announced by the GoI on 1st April 2015, aims at increasing India's export of merchandise and services from \$466 billion in 2013-14 to around \$900 billion by 2019-20 and to raise India's share in world exports from 2% to 3.5%.

B. Banks play an important role in providing the much needed credit for financing exports. Export credit by banks is an eligible item in the revised priority sector guidelines issued by the RBI since 2015.16.

Bank assistance as an export credit is mainly under two categories.- 1 Pre-shipment credit , also known as 'Packing credit' ,is a loan granted to an exporter for financing the purchase, processing, manufacturing or packing of goods prior to shipment. Packing credit can also be extended as working capital assistance to meet expenses such as wages, utility payments, travel expenses etc; to companies engaged in export or services.2. 'Post-shipment credit' refers to any loan or advance granted or any other credit provided by a bank to an exporter of goods and services from India from the date of extending credit after shipment of goods / rendering of services to the date of realization of export proceeds.

(RBI Guidelines on Export Credit- RBI Master Circulars dated 01.07.2013 and 01.07.2015)

The aspects such as the significance of the sector, the share of the state in the total exports from India, the nature of the products exported, Agricultural and Horticultural Export from Maharashtra , Potential Clusters identified by APEDA, the prospects for peculiar commodities like Grapes, onion and Mangoes, the conducive initiatives like the KisanSampadaYojana and the Mission for Integrated Development of Horticulture, the clusters identified under Agri Export Policy 2018,the Special Economic Zones and the Agri Export Zones, the Ground Level Credit flow to the sector in the State etc have been presented in the NABARD website-
<https://www.nabard.org/plp-guide.aspx?id=698&cid=698>

4.1.2 District specific: APEDA has identified potential clusters of Vegetables (fresh/IQF/dehydrated), Pomegranate and Poultry & Poultry products in Maharashtra and Pune district is a part of the cluster.

Agri Export Zones- With a view to promoting agricultural exports from the country and remunerative returns to the farming community in a sustained manner, the concept of the agri export zones (AEZ) was floated. These zones have been set up for end to end development for export of specific products from a geographically contiguous area. Pune comes under Agri export zone for flowers and onion.

Under the agri export policy 2018, Pune district is a part of the cluster for export promotion of Pomegranate and Grapes.

4.1.3 Assessment of credit potential for 2019-20

Export Credit has been included in the Priority Sector from the year 2015-16. Projections for 2019-20 are as follows:

(Rs lakh)						
Sr.No	Activity	Unit (Nos)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Pre shipment/ Packing credit	Nos	55.00	362	19910.00	159280.00
2	Post shipment	Nos	55.00	280	15400.00	12320.00
3	Misc.	Nos	27.50	240	6600.00	5280.00
Total						33528.00

4.1.4 Critical Interventions and Suggested Action Points

- Availability of infrastructure for exports like grading and packing units, quality testing labs, certification issuance at local level, packing houses, pre-cooling units, cold storages, etc. need to be ensured.
- Agriculture Department / APEDA may arrange sensitization workshops for agri-exporters to aware them about current export regulations/policies of importing countries, domestic and international demand and supply situation, price competitiveness, quality concerns, various certifications required, Sanitary & Phytosanitary (SPS) requirements, etc.
- The Agriculture Department may organize buyer-seller meets before the commencement of harvesting season in case of horticulture crops and on regular intervals for vegetable and other exportable commodities.
- Settling the Pre shipment credit within the stipulated time after the dispatch of goods or converting them into Post Shipment credit may be ensured.
- The banks should put in place a control and reporting mechanism to ensure that the applications for export credit are disposed of within the prescribed time frame.
- Exporters may be encouraged to avail the export credit insurance facilities extended by ECGC.
- Micro, Small and Medium Exporters should be properly trained by MSME / export organizations with technical assistance from banks regarding correct filling up of forms.
- APEDA/ Regional centres may be established in more number of districts which can function for:-Developing agro products and agro industries relating to the scheduled products for export, Fixing of standards and specifications for the scheduled products for the purpose of exports, Training in various aspects of the industries connected with the scheduled products, Updating exporters regarding various central government schemes.
- A nodal agency for export needs to be created which can Disseminate trade related useful information to exporters, Identify buyer's market and Take up exporters' queries
- Organization of export through consolidation of production data, identification of target markets and authentication of foreign buyers needs to be attempted.
- Since there is no nodal agency which could disseminate trade related information to prospective exporters, there is little awareness about overseas buyers. This is one of main reasons for fewer exports from various districts despite the potential. There are more traders and less number of direct exporters. There is very little awareness about international exhibitions. In many districts, only a few bank branches have forex facility, as a result of which exporters at times have to rush to bigger cities for getting their formalities done.
- Concerns on the issues such as Certification becoming expensive to small exporters have been expressed
- Industries may be set up for value added product of agricultural produce (like Soyabean , e.g. Soya Papad, Soya chips, Soya instant mix, Soya flour, Soya milk, Tofu etc.)
- Incentives in various forms will enable exporters to reduce their cost and sustain competition from other countries
- There is little exposure for identifying the buyer's market. Thus the export market for a commodity stands unorganized even if its production is high .
- Since the value added products (e.g. garlic paste) have huge demand, processing plants need to be set up for boosting exports.
- Training institutes should be set up to provide training and guidance so as to develop adequate manpower in the sector.

4.2: Education

4.2.1 Literacy and Education level are the basic indicators of the level of development achieved by a society.

In terms of RBI guidelines on Priority Sector advances, educational loans granted to individuals for educational purposes up to Rs 10.00 lakh for studies in India and Rs 20.00 lakh for studies abroad would be classified as Priority Sector advances.

The Economic Survey of Maharashtra 2017.18 covers the Social Sector of Education with the detailed scenario in the State encompassing School education, SarvaShikshaAbhiyan, Administrative Reforms, PragatShaikshanik Maharashtra Programme, Schemes to encourage education, Girls education, Higher and Technical education, Maharashtra Public Universities Act 2016, RCSS tuition fees scholarship scheme etc. that can be referred at -<http://mahades.maharashtra.gov.in>

While the banks may pro-actively finance new cases to the deserving candidates, a mechanism may have to be worked out to address the concerns of NPAs in the previous cases, if any, expressed by bankers. Educational institutions may transparently provide the precise information regarding various fees charged by them so that there is no gap between the demand by a student and the supply by a banker.

The aspects such as the significance of the sector, the spread of educational institutions entailing credit needs, the Ground Level Credit flow to the sector in the State, the IBA- model education scheme etc have been presented in the NABARD website-

<https://www.nabard.org/plp-guide.aspx?id=698&cid=698>

4.2.2 Education Sector –Scenario in Maharashtra/Pune :

Population & Literacy – 2011 Census (Lakh)

Particulars	Population			Literacy%
	Rural	Urban	Total	
All India	8330.88	3771.06	12101.93	74.0
Maharashtra	615.56	518.18	1133.74	82.34
Pune	36.87	57.42	94.29	87.0

Literacy rate in Maharashtra has seen upward trend and is 82.34 percent as per 2011 population census.

4.2.3 Assessment of Potential for the year 2019-20

The colleges existing in the district offer vast potential for students to pursue their education. Large number of students go abroad for higher education. Many of the students are dependent on bank finance for taking up their education in India as well as abroad.

Based on the scope for the sector credit potential for education for 2019-20 is projected as under:
(Rs lakh)

Sr.No.	Activity	Unit (Nos)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Within India	Nos	12.00	24840	298080.00	238464.00
2	Overseas education	Nos	20.00	10982	219640.00	175712.00
Total						414176.00

4.2.4 Availability of Infrastructure, critical gaps and interventions required, action points / issues to be addressed

- For the state of Maharashtra, there is a tremendous inclination among the students to study abroad; the renewed focus on “education loan” would facilitate enhanced credit flow to the sector.
- Pune is extremely well connected with the rest of the country by road, railway and air transportations.
- Pune is considered as the oxford of India with its many educational, professional, technical and research institutions.
- The scope of education has widened both in India and abroad covering new courses in diversified areas. Pune has a good mix of Government and private colleges imparting professional and technical education which has been creating natural demand for students going abroad for higher education.
- The sector has been hampered by larger number of defaults, primarily arising out of frequent change of address by the students and therefore it has been advocated the loan under this category be securitized to give quantitative and qualitative push to the sector. Parents can be taken as co-guarantor to bring down incidence of defaults in “education loan”.
- Government Departments may take initiative for an awareness drive in Universities, educational institutions in order to spread message of education loans to the potential students.
- Banks should design appropriate educational schemes in order to provide educational loan to the students for higher studies on reasonable terms and condition.

4.3: Housing

4.3.1 The housing sector is one of the prime engines of economic growth as it satisfies the social needs, generates employment and stimulates economy with its spill-over effects. GoI has resolved 'Housing for all by 2022'

As per the RBI circular dated 19.6.2018 (RBI- FIDD.CO.Plan.BC 22 / 04.09.01/ 2017.18) , with a view to bringing convergence of the Priority Sector Lending guidelines for housing loans with the Affordable Housing Scheme, and to give a fillip to low-cost housing for the Economically Weaker Sections and Low Income Groups, the housing loan limits for eligibility under priority sector lending are revised to Rs 35 lakh in metropolitan centres (with population of ten lakh and above), and Rs 25 lakh in other centres, provided the overall cost of the dwelling unit in the metropolitan centre and at other centres does not exceed Rs 45 lakh and Rs 30 lakh, respectively. Furthermore, the existing family income limit of Rs 2 lakh per annum, prescribed under Para 10.4 of the above Master Direction, for loans to housing projects exclusively for the purpose of construction of houses for Economically Weaker Sections (EWS) and Low Income Groups (LIG), is revised to Rs 3 lakh per annum for EWS and Rs 6 lakh per annum for LIG, in alignment with the income criteria specified under the Pradhan Mantri Awas Yojana.

The Economic Survey of Maharashtra 2017-18 covers the Social Sector of Housing with the detailed scenario in the State encompassing Urban and Rural Housing featuring Pradhan Mantri Awas Yojana, State Schemes for ST/ SC- NB, Assistance for purchase of land etc that can be referred at <http://mahades.maharashtra.gov.in>.

Banks may adopt a flexible approach in relation to credit appraisal and ensure speedy processing of the loan applications. While the banks may proactively finance new deserving cases , a mechanism may have to be worked out to address the concerns of NPAs in the previous cases.

The aspects such as the significance of the sector, the gaps/ requirements entailing credit needs, the initiatives taken by the GoI and the State Govt, and achievements under various schemes like Pradhan Mantri Awas Yojana etc, the Ground Level Credit flow to the sector in the State, Refinance from NABARD etc have been presented in the NABARD website-

<https://www.nabard.org/plp-guide.aspx?id=698&cid=698>

4.3.2 Assessment of Credit Potential for 2019 -20

As per Census 2011, out of the total 20,76,607 Households in Pune 7,44,114 households are in rural and 13,32,493 in urban area dwell in either semi-permanent or total temporary houses. In 2011, total 53,670 families live in dilapidated houses and 18,000 families live on footpath or without any roof cover in Pune district.

Owning a dwelling unit is a basic requirement of every household, however, there is a huge mismatch between demand and supply in housing sector. Availability and access to institutional credit at affordable rate is one of the reasons for this mismatch. Rating agency CRISIL predicts the collective portfolio of all lenders (NBFCs, HFCs and banks) to housing sector to double to 5 lakh crore by March 2019.

Based on the scope for the sector, credit potential for housing for 2019-20 is projected as under:
(Rs lakh)

Sr.No.	Activity	Unit (Nos)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Rural & Semi-urban housing	Nos	27.50	26300	723250.00	578600.00
2	Urban housing	Nos	33.00	17000	561000.00	448800.00
3	Renovation of house	Nos	2.75	43570	119817.50	95854.00
Total						1123254.00

4.3.3 Availability of Infrastructure, critical gaps and interventions required, action points / issues to be addressed

Availability of Infrastructure, Critical gaps

- There is much scope for disbursement of housing loan as the demand side is increasing day by day with increase in the standard of living, urbanization, industrialization, migration of rural population to urban areas, employment and rising income.
- Many housing schemes are being implemented by Central Govt/MHADA/State government/Municipal Corporation in Pune.

Critical intervention required for creating a definitive impact in the sector

The synchronization of central and state government schemes, uniformity in guidelines in terms of rate of interest, administrative charges, quantum of loan, etc., and coordination amongst Central and State Nodal Agencies would help in boosting the housing loan finance in the district.

Suggested Action Points

Government Departments:

- The Central and State Nodal Agencies viz. HUDCO, NHB, MHADA, DRDA may arrange block level campaigns for popularizing these schemes.

Banks:

- There is huge demand for purchase /renovation of housing.
- The documentation should be rationalized at bank level.
- Banks should participate in various housing schemes of central and state government.

Chapter 5 Infrastructure Support

Infrastructure – Public investments

Infrastructure development has a key role to play in both economic growth and poverty reduction. Rural infrastructure, in particular is an effective driver of growth for increase in productivity in agriculture and poverty reduction both within and outside agricultural sectors.

5.1.1 Rural Infrastructure Development Fund (RIDF)

The GOI established a fund to be operationalized by NABARD in the Union Budget 1995–96 called the Rural Infrastructure Development Fund (RIDF) which was set up within NABARD by way of deposits from Scheduled Commercial Banks operating in India, to the extent of shortfall in their agricultural lending / priority sector/ weaker sections. RIDF started with initial corpus of Rs.2000 crore. The scheme has been continued with substantial allocations in the successive Union Budgets and NABARD has partnered with various State Governments in the creation of rural infrastructure. Initially, the mandate under the Fund was to support projects in the irrigation sector where substantial investments had been made but which could not be completed owing to resource constraints of the State Governments. In successive budget announcements, further contributions were made to the corpus and with the allocation of Rs.25,000 crore for 2018-19 under RIDF XXIV, the cumulative allocation has reached Rs.317500 crore including Rs 18,500 crore under Bharat Nirman.

Over the years, the coverage under RIDF has been made more broad based in each tranche and at present, a wide range of 36 sectors under RIDF are being financed. RIDF has emerged as NABARD's major partnership with the state government for creation of variety of rural infrastructure covering activities under rural connectivity (roads & bridges), irrigation (micro, minor, medium and major), kharland development, warehouses and fisheries (fish jetties).

5.1.2 Status of RIDF in the district

The cumulative purpose wise number of projects and amount sanctioned, projects completed and amount disbursed in respect of **ongoing tranches** (i.e., RIDF XVIII to XXIII) in the **district** is given hereunder:

(RsLakh)

Sr. No.	Sector	Sanctioned		% share in total	Loan Disbursed
		No. of Projects	Loan		
1	Roads (PWD)	99	9368.67	36	6851.62
2	Bridges (PWD)	14	7726.31	29	6507.32
3	Rural Roads (RuralDevtDept)	12	2419.53	9	903.27
4	Irrigation (WRD)and micro irrigation	1	1895.91	7	1895.91

RIDF Projects - Action Points at District Level

State Govt:

- There is need for line departments of Government of Maharashtra to keep various projects in pipeline so that the same can be taken up for funding under RIDF.
- Projects under Irrigation sector may be posed to NABARD only after getting all necessary clearances from Forest / Revenue Departments and completing the formalities relating to land

acquisition, rehabilitation etc., to avoid abnormal delay and cost escalation in implementation of projects.

- Implementing line departments may ensure that adequate budgetary allocation for maintenance of assets is made so that the infrastructure projects can be put to use for a longer period of time.
- People's participation under irrigation projects by creation of Water Users Association (WUA) has not gathered momentum, resulting in low utilisation of irrigation potential and non-maintenance of the field channels. Efforts may be made to form WUAs under irrigation projects to ensure effective functioning of WUAs, wherever formed, so that benefits reach the community.
- PWD may ensure to complete the connectivity of the road network to the market centres so that concrete benefits can be realised by the beneficiary villagers (road projects).
- PWD may focus on construction of new roads in rural areas, rather than upgradation of MDRs.
- Implementing departments should not pose projects proposed under RIDF under any other programme, to avoid multi-agency financing.
- Departments may ensure to submit reimbursement claims periodically through the nodal office; this would enable easy and quick availability of concessional funds provided to the State under RIDF.

5.1.3 Long Term Irrigation fund (LTIF)

The Hon'ble Union Finance Minister, during his Budget speech 2016-17, announced the creation of a dedicated Long Term Irrigation Fund (LTIF) in NABARD with an initial corpus of ₹ 20,000 crore by way of budgetary resources and /or market borrowings by NABARD (both under GoI fully serviced bonds and own borrowings) for funding and fast tracking of the incomplete major and medium irrigation projects identified by Ministry of Water Resources, River Development and Ganga Rejuvenation (MoWR, RD&GR), GoI. In Maharashtra, State Government was sanctioned a loan amount of Rs.7242.73 crore under LTIF for completion of 23 projects of which Rs.3682.84 crore has been released. With availability of ready funds, it is expected that these projects, when completed, would bring an area of 7.84 lakh ha under irrigation.

Chapter 5.2

Social Infrastructure involving Bank Credit

5.2.1. Introduction: The provision of drinking water, sanitation, education, and health defines the quality of life of an individual. Qualitative services through public participation provide the best results in the social sector development. In addition to the public investment, these infrastructure covering schools, health care facilities, drinking water and sanitation can also be improved by people's participation in convergence with govt schemes and bank credit. Therefore, RBI has, in its Priority Sector Lending Master Direction issued by RBI on 7 April 2016, stipulated that bank loans up to a limit of Rs.5.00 crore per borrower for building social infrastructure for activities namely schools, health care facilities, drinking water facilities and sanitation facilities in Tier II to Tier VI centres have now been brought under the ambit of PSL norms.

Literacy rate in Pune district is 86% (Male- 91% & Female – 81%) as compared to 82.3% for the State. There are 5417 (1,04,971) Primary Schools having 8.34 lakh students on roll and 1654 (5,595) Secondary Schools having 9.97 lakh students. Student-Teacher ratio is 29 (29) for Primary and 32 (32) for Secondary schools. (Figures in bracket is for the State).

In Pune district, 48 hospitals, 4 Speciality hospitals (eg.T.B., Cancer, etc.,) 79 dispensaries, 417 Maternity homes and 98 Primary health centres are available. As per Indian Human Development Report-2011, Human Development Index for Maharashtra is 0.572. As per Maharashtra Human Development Report 2012, Human Development Index for Maharashtra is 0.752 and the same for Pune the same is 0.814. (Source: Economic Survey of Maharashtra 17-18 and DSA- Pune, 2017.)

5.2.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr. No	Activity	Unit (Nos)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Sanitation (Toilets)	No.	0.13	5230	679.90	611.91
2	PHC/Nursing para medical centres	No.	11.00	20	220.00	198.00
3	Drinking Water RO units	No.	13.20	48	633.60	570.24
4	Repair to Public Infra.	No.	1.10	1530	1683.00	1514.70
5	Miscellaneous	No.	5.50	1243	6836.50	6152.85
					Total	9047.70

Critical intervention required for creating a definitive impact in the sector

Assured and continuous availability of electricity and skilled manpower like teachers, doctors, timely maintenance services would help in creating definitive impact in this sector.

5.2.3 Suggested Action Points

Government Departments

- Wherever possible, toilet constructions may be linked to Indira AwasYojana.
- Availability of manpower for the created infrastructure is essential. This may require skill upgradation of manpower and in case of hospitals – professionals.
- Participation of the beneficiaries, especially women, in water supply schemes may be ensured.
- The Village Water and Sanitation Committees may be formed and their capacity building may be done.

Banks

- Bankers may proactively take up financing of these activities to full fill their priority sector obligations.

Chapter 5.3

Credit Potential for Renewable Energy

5.3.1 Introduction:

Clean energy is the “Need of the Hour” for mooted development process on a sustainable basis. As the world witnesses a growth in demand for clean energy, the generation of power through new and renewable energy has been the thrust area of every state and central government. The Government of Maharashtra recognizes green energy as one of its focus sectors and has thus emerged as one of the leader state of India’s future renewable energy programme.

Present Status

Renewable energy has become a major focus area of the government with the ambitious target of achieving 40 percent cumulative electric capacity from non-fossil fuel-based energy resources by 2030. India is currently undertaking the largest renewable capacity expansion programme in the world. The total renewable energy capacity target has been increased to 175 GW by the year 2022, out of which 100 GW is to be from solar, 60 GW from wind, 10 GW from biomass and 5 GW from small hydro power subjects.

As per priority sector guidelines issued by RBI, bank loans can be extended upto a limit of Rs 15 crore to borrowers for purposes like solar based power generators, biomass based power generators, windmills, micro-hydel plants and for non-conventional energy based public utilities viz.,

street lighting systems, and remote village electrification. For individual households, the loan limit will be Rs 10 lakh per borrower.

5.3.2 Assessment of Credit Potential for 2019-20

(Rs lakh)

Sr.No.	Activity	Unit (No/Acre)	Unit Cost	Physical Unit	TFO	Bank Loan
1	Biogas Plant	No.	0.27	2450	661.50	330.75
2	Solar Cooker	No.	0.05	1615	80.75	72.70
3	Solar Fencing	Acre	2.12	305	646.60	484.95
4	Bagasse Unit	No.	30.25	20	605.00	453.78
5	Wind Energy	No.	641.30	6	3847.80	3463.02
6	Solar Pump Sets	No.	0.12	1545	185.40	92.70
7	Solar Home lights	No.	0.12	2700	324.00	162.00
Total						5059.90

5.3.3 Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- Presence of adequate infrastructure and support services in the district are positive factors which help promoting the use of non-conventional and renewable sources of energy, for setting up of Solar Energy and Biogas Based Plant etc.
- District Agricultural Officers/Extension Officers provide necessary technical support for putting up Bio-gas plants.
- Trained masons are available for construction of biogas plants and skilled personnel are available for providing post installation services.
- All the material, necessary for commissioning biogas plants, such as cement, bricks, steel etc, are easily available in the district.
- Khadi& Village Industries Commission (KVIC) has set up a handmade paper manufacturing and training centre at Pune for providing training to the entrepreneurs aspiring to set up a handmade paper unit.

Action points/issues to be addressed

- Awareness among farmers has to be created about various renewable energy and waste management/utilization programs of the government.
- All Govt Sponsored subsidy programmes should be credit linked to ensure proper end use monitoring
- Incentives may be provided to SHGs for taking up renewable energy programmes and establishing small vermin culture units
- There is need to link government programmes with the bank credit so that sufficient number of beneficiaries could be covered.
- Corporates may be persuaded to adopt Solar/wind energy or similar devices so as to save and conserve energy.
- Hotel Industry and Hospital may shift to Solar Power Lights/ Water Heating Devices.
- Pune and Pimpri-Chinchwad Municipal Corporations and Nagar Parishadas should set up a compost making unit and lease out to NGOs.
- Chamber of Commerce may organize a workshop to popularize renewable energy products. This assumes importance as the power deficit is increasing every year Banks may provide low cost solar light to members of SHG located in inaccessible areas.

Chapter 6 Informal Credit Delivery System

6.1 Introduction

The micro finance sector is an important tool for policy makers to reach out to the grass root level and it has a vital role to play in complementing the efforts of the Government of India in addressing the issues like financial exclusion, providing livelihoods and empowering the citizens, and women in particular. The bank led SHG-BLP, pioneered by NABARD, and has grown from small pilot programme of 500 SHGs in 1992 to the largest microfinance programme of the world, with an outreach spanning more than 10.55 crore rural households. The SHG Bank Linkage programme has emerged as the largest micro finance outreach programme in the world. The programme is the most cost effective and fast-growing micro finance initiative.

As on 31 March 2018, there are more than 87.44 lakh SHGs with aggregate bank deposits of about Rs.19592crore, annual loan take off touching almost Rs47185crore and loans outstanding at nearly Rs.75598crore in the country whereas in Maharashtra state, there are 8.48 lakh SHGs with savings of Rs.949 crore. During 2017-18, a total of 112043 SHGs were disbursed loan to the extent of Rs.1381crore which accounts for 3% of the total loans disbursed in the country

6.2 Status of SHG-BLP in Pune:

In Pune District the total number 66515 SHGs formed constituted 7.9% of Maharashtra State as on 31 March 2018 reaching to 9.90 lakh poor households. In view of reaching to almost all the rural household in the district no new potential is assessed. However, considering the population rise since 2011, a modest increase of 1800 SHGs has been assessed.

6.3 On-going Initiatives- Micro Finance Profile in the District:

The agencies viz. BAIF development research foundation, LUPIN human welfare and research foundation, Chaitanya, GraminMahilaBalakVikas, Helpo foundation, JananaPrabhodhini and other agencies like MAVIM, DRDA/MSRLM, PDCCB etc.,are also engaged in promotion and credit linkages of SHGs.

As per the available data as on 31.03.2018: 66515 SHGs were saving linked out of which 49235 were credit linked and the total bank loan outstanding was Rs3723.45 lakh.

6.4 Micro Finance Profile of the district

Total No. of blocks in the district	14
No. of blocks where SHGs exist	14
No. of blocks where SHGs are credit linked	14
No. of NGOs in the district (Sizeable participation)	10
No. of NGOs participating in credit linkage programme	10
No. of NGOs who can be roped in during the year	0
Total No. of Bank branches in the district	CBs 1346 RRBs 19 Coops 261
No. of branches participating in linkage programme	All Bank branches
No. of additional branches proposed to be roped in	0
No. of banks acting as SHPIs	0
No. of Government/other agencies participating	DRDA/ MAVIM
No. of Govt./other agencies likely to participate	0

93 Village level programmes were conducted during the year 2017-18 aiming at imparting financial literacy amongst the women empowering them to prioritise their needs and use available resources effectively. During the year 2018-19, 02 training programme of SHG leaders/members and 112 Village level programmes have been planned to be conducted under SHG-BLP to give a fillip to SHGBLP.

6.5 Financing of Joint Liability Groups

Apart from extending 100% refinance support to Banks, NABARD also extends financial support for awareness creation and capacity building of all stakeholders of this programme. Besides, NABARD extends grant support for formation and nurturing of JLGs to banks and other JLG promoting agencies.

During 2017-18 total number of JLGs credit linked in Maharashtra are 65041 with an amount of Rs. 107528.77 lakh as compared to 1019399 JLG financed in India with an amount of Rs. 1395514.55 lakh. More than 500 JLGs have been formed and credit linked in the district by Mandeshi bank. They were identified by NABARD as JLGPI in formation and credit linkage of 1000 JLGs.

The JLG mode of financing serves as collateral substitute for loans provided to the small, marginal, tenant farmers, oral lessees, share croppers, etc. It enables the banks to reach farmers through group approach, adopt cluster approach, facilitates education and credit discipline. Hence, banks in the district may increase their financing to the small, marginal, tenant farmers and oral lesses through JLG mode of financing. Considering the number of farmers with less than one hectare of land in the district as 4.19 lakh, there is potential for formation / promotion of 83800 JLGs which can be credit linked in phased manner in the district.

6.6 Future Strategy

- While continuing with its goal of spreading its outreach, SHG-BLP needs to re-invent itself to help more and more of its members to use the programme as a platform to expand their economic activities and improve their income levels. This calls for identification of appropriate livelihood opportunities, improvement of their skills, mentoring, market development and many such development initiatives.
- Skill development is an important tool for improving the employability and enhancing productivity of the working poor and thereby reducing poverty and exclusion. Rural poor women typically face difficulties or discrimination in accessing good quality training. Keeping the above in view, NABARD continued with *MicroEnterprise Development Programme* (MEDP) to nurture the entrepreneurial talents of members of mature SHGs.
- NABARD has introduced a new *Livelihood and Enterprise Development Programme* with a view to create sustainable livelihoods among SHG members and to create maximum impact of skill upgradation. These programmes are implemented in small batches for a maximum of 150 SHG members in a cluster of contiguous villages on a project basis covering 15 to 30 SHGs. The programme provides for livelihood creation in agricultural & allied activities as well as rural non-farm sector activities. One LEDP on Goatery has been sanctioned to LUPIN Foundation in Junnar block.

6.7 Assessment of Potential

A rough estimate of number of SHGs required to be formed and credit linked so as to achieve the mission that every household in rural areas is covered under SHG is worked out as under

1	Population of the district	9429000
2	Rural population	3678000

3	No. of households (2 above / 5*)	735600
4	No. of SHGs required (3 above / 15**)	49040
5	No. of SHGs already linked	66515
6	Balance (4-5)	1800##

*average members per household **average members per SHG

Though the scope for formation of new SHGs in the district is exhausted, the potential is showed on the assumption that each year there is growth in population over the base year taken for the estimation of potential of SHGs s population census 2011.

Block wise details of potential available for promotion and saving linkage of SHGs

Sl. No.	Name of the Block	Total potential for promotion of SHGs	No. of SHGs savings linked on 31 March 2018	Balance potential as on 31 March 2017	No. of SHGs to be promoted and savings linked during 2018-19	No. of SHGs to be promoted and savings linked during 2019-20

Credit Potential for Others

Introduction:

In terms of revised RBI guidelines on priority sector lending, the following classification have been made under this category.

- Loans not exceeding Rs 50,000/- per borrower provided directly by banks to individuals and their SHG/JLG, provided the individual borrower's household annual income in rural areas does not exceed Rs 100,000/- and for non-rural areas it does not exceed Rs 1,60,000/-
- Loans to distressed persons not exceeding Rs 1,00,000/- per borrower to prepay their debt to non-institutional lenders.
- Overdrafts extended by banks upto Rs 5,000/- under Pradhan Mantri Jan-Dhan Yojana (PMJDY) accounts provided the borrowers household annual income does not exceed Rs 1,00,000/- for rural areas and Rs 1,60,000/- for non-rural areas.
- Loans sanctioned to State Sponsored Organizations for Scheduled Castes/ Scheduled Tribes for the specific purpose of purchase and supply of inputs and/ or the marketing of the outputs of the beneficiaries of these organizations.

Assessment of Credit Potential for 2019-20:

The details of activity wise projections for the year 2019-20 are furnished below:

(Rs lakh)

Sr.No.	Activity	Unit(Nos)	Unit Cost	Physical Unit	TFO	Bank Loan
1	SHG – Fresh Finance	No.	0.55	1800	990.00	990.00
2	SHG Repeat Finance	No.	1.50	23247	34870.50	34870.50
3	Loans to JLGs	No.	2.00	3000	6000.00	6000.00
4	PMJDY Overdrafts	No.	0.05	2000	100.00	100.00
5	Loan to distress persons	No.	1.00	3500	3500.00	3500.00
6	Consumption	No.	0.50	18750	9375.00	9375.00
Total						54835.50

Availability of Infrastructure, critical gaps & interventions required, action points/issues to be addressed

- There is good scope for disbursement of small loans to individuals for consumption, household needs, minor agricultural needs etc.
- The district also has good potential for financing SHGs and JLGs in view of increasing demand by the groups for commencing income generating activities.

Action points/issues to be addressed

- Banks to undertake quick disposal of all loan applications.
- Bankers are required to provide adequate quantum of consumption loans especially to SF/MF and small entrepreneurs. This will avoid diversion of production loans for consumption purposes.
- Banks to extend adequate credit to minorities and women as to meet the benchmark prescribed by RBI.
- Development Departments may extend necessary help to banks to expand credit and recovery.
- Regular monitoring of finance to the sector may be taken up on all related fora.

Annexure IV

Indicative unit costs for various agricultural activities as arrived at by NABARD/Unit Cost Committee

Sr.No.	Item	Unit Cost (Rs)
A	Minor Irrigation	
1	Dug well	100000-130000
2	Bore well	26000-35000
3	Submersible Pump sets 5 HP	55000
4	Electric Pump sets 5 HP	30000
5	Diesel Pump sets 5 HP	35000
6	Drip Irrigation Systems in Grape, Sugarcane, Cotton Ginger, Vegetable Rose, Strawberry, Other flowers (Rs/ha)	100000
7	Drip in other fruit crops (Rs/ha)	25000-50000
8	Sprinkler in pulses, oilseeds, other field crops (Rs/ha)	25000-30000
B	Plantation and Horticulture (Rs/ha)	
1	Mango	145000
2	Grapes	1054000
3	Pomegranate	205000
4	Mandarin orange	176000
5	Sweet orange	161000
6	Acid lime	167000
7	Aonla	79000
8	Sapota	129000
9	Custard apple	114000
10	Cashew nut	94000
11	Fig	158000
12	Bamboo plantation	30000
13	Shade net for flowers and vegetables 10 R	363100
14	Shade net for flowers and vegetables 20 R	627400
C	Land Development	
1	Farm bunding/Graded bunding	15600
2	Land levelling and shaping slope 1-2%	11700
3	Fencing (running mts)	145/m
4	Field drainage for wet lands	29600
D	Animal Husbandry	
1	2 CB Cows	120000
2	2 Buffaloes	136000
E	Fisheries	
1	Composite pond new	206800
2	Composite pond renovation	176200
3	Shrimp Farming	448140

Annexure-V

Scale of Finance for major crops fixed by District Level Technical Committee (DLTC) for 2018-19

Sr.No.	Name of the Crop	Unit (Ha)	Scale of Finance (Rs Lakh)
1	Sugarcane	Ha	1.15
2	Jowar	Ha	0.26
3	Bajra	Ha	0.25
4	Ragi	Ha	0.28
5	Paddy	Ha	0.48
6	Onion	Ha	0.65
7	Maize	Ha	0.28
8	Til	Ha	0.22
9	Sunflower	Ha	0.25
10	Soyabean	Ha	0.36
11	Groundnut	Ha	0.38
12	Moong	Ha	0.18
13	Udid	Ha	0.18
14	Toor	Ha	0.30
15	Wheat	Ha	0.33
16	Gram	Ha	0.27
17	Fodder Crops	Ha	0.30
18	Vegetables	Ha	0.30
19	Guava	Ha	0.50
